Code of ethics to check malpractices and plagiarism in research

The college is committed to producing and promoting research of highest quality, devoid of plagiarism of any sort and other unethical practices while trying to allow academic freedom and innovative thinking. College instructs its teachers and students to abide by the highest standards of integrity in their conduct of academic research and they have to conform to the following:

- No form of plagiarism is allowed in the college. Plagiarism may be of various kinds such as claiming another's paper as one's own, copying or paraphrasing substantial parts of another's work without due acknowledgement and claiming credit for another's research and so on.
- Plagiarism check-tool is made available to all faculty to check research documents connected with research and manuscripts to journals. Every student of the institute pursuing degree has to check his/her final project report using plagiarism detector software before submission.
- While conducting conferences/seminars/workshops, the faculty members must examine the veracity of submissions.
- The author should emphasize proper acknowledgment in the presentation and the publication of manuscripts. Authorship should be awarded to those persons who have made an original and significant contribution to the conceptualization, design, execution, and interpretation of the published work.
- It is inappropriate and unacceptable to submit extracts from research to more than one publisher unless such action has been approved by the editors of each publication or multiple submissions is the acceptable standard practice in the specific discipline.
