

# **SEMESTER 5**

**ELECTRONICS & COMMUNICATION  
ENGINEERING**

## SEMESTER S5

### ELECTROMAGNETICS

|  |   |                    |               |
|--|---|--------------------|---------------|
| <b>Course Code</b>                         | <b>PCECT501</b>                               | <b>CIE Marks</b>   | 40            |
| <b>Teaching Hours/Week<br/>(L: T:P: R)</b> | 3:1:0:0                                       | <b>ESE Marks</b>   | 60            |
| <b>Credits</b>                             | 4   | <b>Exam Hours</b>  | 2Hrs. 30 Min. |
| <b>Prerequisites (if any)</b>              | Physics for Electrical sciences<br>(GBPHT121) | <b>Course Type</b> | Theory        |

#### Course Objectives:

1. To impart knowledge on the basic concepts of electric and magnetic fields and its applications.

#### SYLLABUS

| <b>Module No.</b> | <b>Syllabus Description</b>  | <b>Contact Hours</b> |
|-------------------|--|----------------------|
| <b>1</b>          | Review of coordinate system-Rectangular, cylindrical and spherical coordinate systems. Review of vector calculus- curl, divergence gradient. Review of Coulomb's law, Gauss's law and Ampere's current law. Derivation of capacitance and inductance of two wire transmission line and coaxial cable. Magnetic scalar and vector potential. Poisson and Laplace equations, Determination of voltage and electric field using Laplace and Poisson's equation. | <b>12</b>            |
| <b>2</b>          | Maxwell's equation from fundamental laws. Boundary condition of electric field and magnetic field from Maxwell's equations. Solution to wave equation Propagation of plane EM wave in perfect dielectric, lossy medium, good conductor, skin depth. Polarization of waves.   | <b>10</b>            |
| <b>3</b>          | Reflection and refraction of plane electromagnetic waves at boundaries for normal & oblique incidence (parallel and perpendicular polarization), Snell's law of refraction, Brewster angle. Power density of EM wave, Poynting   | <b>10</b>            |

|          |   |           |
|----------|---|-----------|
|          | vector theorem.   |           |
| <b>4</b> | Transmission line as circuit elements (L and C). Transmission line equations and characteristic impedance. Reflection coefficient and VSWR. Derivation of input impedance of transmission line. Calculation of line impedance and VSWR using smith chart. The hollow rectangular waveguide –TE and TM wave-dominant mode, group velocity and phase velocity –derivation and simple problems only. | <b>12</b> |

**Course Assessment Method**  
(CIE: 40 marks, ESE: 60 marks)

**Continuous Internal Evaluation Marks (CIE):**

| <b>Attendance</b> | <b>Assignment/<br/>Microproject</b> | <b>Internal<br/>Examination-1<br/>(Written)</b> | <b>Internal<br/>Examination- 2<br/>(Written )</b> | <b>Total</b> |
|-------------------|-------------------------------------|---|---|--------------|
| <b>5</b>          | <b>15</b>                           | <b>10</b>                                       | <b>10</b>   | <b>40</b>    |

**End Semester Examination Marks (ESE)**

*In Part A, all questions need to be answered and in Part B, each student can choose any one full question out of two questions*

| <b>Part A</b>  | <b>Part B</b>  | <b>Total</b> |
|--|--|--------------|
| <ul style="list-style-type: none"> <li>● 2 Questions from each module.</li> <li>● Total of 8 Questions, each carrying 3 marks</li> </ul> <p style="text-align: center;"><b>(8x3 =24 marks)</b></p> | <ul style="list-style-type: none"> <li>● Each question carries 9 marks.</li> <li>● Two questions will be given from each module, out of which 1 question should be answered.</li> <li>● Each question can have a maximum of 3 sub divisions.</li> </ul> <p style="text-align: center;"><b>(4x9 = 36 marks)</b></p> | <b>60</b>    |

## Course Outcomes (COs)

At the end of the course students should be able to:

| Course Outcome |   | Bloom's Knowledge Level (KL) |
|----------------|---|------------------------------|
| <b>CO1</b>     | Summarize the basic mathematical concepts related to electromagnetic vector fields. | <b>K2</b>                    |
| <b>CO2</b>     | Apply Maxwell's equations in different forms to diverse electromagnetic problems.   | <b>K3</b>                    |
| <b>CO3</b>     | Analyze reflection, refraction and power density of electromagnetic waves.          | <b>K3</b>                    |
| <b>CO4</b>     | Analyse the propagation of EM waves in transmission lines and wave guides.          | <b>K3</b>                    |

Note: K1- Remember, K2- Understand, K3- Apply, K4- Analyse, K5- Evaluate, K6- Create

### CO-PO Mapping Table:

|            | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 |
|------------|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|
| <b>CO1</b> | 3   |     |     |     |     |     |     |     |     |      |      | 2    |
| <b>CO2</b> | 3   | 3   | 2   | 2   | 2   |     |     |     |     |      |      | 2    |
| <b>CO3</b> | 3   | 3   | 2   | 2   | 2   |     |     |     |     |      |      | 2    |
| <b>CO4</b> | 3   | 3   | 2   | 2   | 2   |     |     |     |     |      |      | 2    |

| <b>Text Books</b> |  |                             |                              |                               |
|-------------------|--|-----------------------------|------------------------------|-------------------------------|

## SEMESTER S5

### ANALOG AND DIGITAL COMMUNICATION

|  |  |                    |               |
|--|--|--------------------|---------------|
| <b>Course Code</b>                         | <b>PCECT502</b>  | <b>CIE Marks</b>   | 40            |
| <b>Teaching Hours/Week<br/>(L: T:P: R)</b> | 3-1-0-0  | <b>ESE Marks</b>   | 60            |
| <b>Credits</b>                             | 4  | <b>Exam Hours</b>  | 2Hrs. 30 Min. |
| <b>Prerequisites (if any)</b>              | PCECT402 Signals and Systems<br>GBMAT401 Probability, Random Process and Numerical Methods | <b>Course Type</b> | Theory        |

#### Course Objectives:

1. To analyse different analog and digital communication systems

### SYLLABUS

| <b>Module No.</b> | <b>Syllabus Description</b>   | <b>Contact Hours</b> |
|-------------------|---|----------------------|
| <b>1</b>          | Block diagram of a communication system. Need for modulation. Amplitude modulation, Equation and spectrum of AM signal, DSB-SC, SSB -pilot carrier and Vestigial sideband systems.<br>Angle modulation: Narrow and wide band FM and their spectra, relationship between FM and PM, Carson's rule, pre-emphasis and de-emphasis filtering.<br>Comparison of AM and FM, Block diagram of FM receiver.<br>Superheterodyne receivers- Characteristics of receivers –image frequency.<br>Noise: external, internal, White noise. | <b>12</b>            |
| <b>2</b>          | Sampling and Quantization, SQNR for uniform quantization, Companding<br>Pulse code modulation, Transmitter and receiver. DPCM transmitter and receiver. Delta modulation, Slope overload, Line codes.   | <b>10</b>            |
| <b>3</b>          | Baseband data transmission of digital data through AWGN channel, Mathematical model of ISI, Nyquist criterion for zero ISI, Signal modelling for ISI, Raised cosine spectrum, Equalization, Zero forcing Equaliser.<br>Geometric representation of Signals-Gram-Schmitt procedure, Signal space.<br>Vector model of AWGN channel.<br>Matched filter and correlation receivers, MAP receiver, Maximum likelihood   | <b>12</b>            |

|          |   |           |
|----------|---|-----------|
|          | receiver.   |           |
| <b>4</b> | Digital band pass modulation schemes-BPSK system and signal constellation. BPSK transmitter and receiver. QPSK system and Signal constellations. BER analysis of BPSK and QPSK in erfc. Plots of BER Vs SNR. QPSK transmitter and receiver. Quadrature amplitude modulation and signal constellation. | <b>10</b> |

**Course Assessment Method**  
(CIE: 40 marks, ESE: 60 marks)

**Continuous Internal Evaluation Marks (CIE):**

| <b>Attendance</b> | <b>Assignment/<br/>Microproject</b> | <b>Internal<br/>Examination-1<br/>(Written)</b> | <b>Internal<br/>Examination- 2<br/>(Written)</b> | <b>Total</b> |
|-------------------|-------------------------------------|---|--|--------------|
| <b>5</b>          | <b>15</b>                           | <b>10</b>                                       | <b>10</b>  | <b>40</b>    |

**End Semester Examination Marks (ESE)**

*In Part A, all questions need to be answered and in Part B, each student can choose any one full question out of two questions*

| <b>Part A</b>  | <b>Part B</b>  | <b>Total</b> |
|--|--|--------------|
| <ul style="list-style-type: none"> <li>● 2 Questions from each module.</li> <li>● Total of 8 Questions, each carrying 3 marks</li> </ul> <p style="text-align: center;"><b>(8x3 =24 marks)</b></p> | <ul style="list-style-type: none"> <li>● Each question carries 9 marks.</li> <li>● Two questions will be given from each module, out of which 1 question should be answered.</li> <li>● Each question can have a maximum of 3 sub divisions.</li> </ul> <p style="text-align: center;"><b>(4x9 = 36 marks)</b></p> | <b>60</b>    |

## Course Outcomes (COs)

At the end of the course students should be able to:

| Course Outcome |  | Bloom's Knowledge Level (KL) |
|----------------|--|------------------------------|
| CO1            | Illustrate the principles of analog communication systems                                  | <b>K2</b>                    |
| CO2            | Explain the basic concepts of digital communication  | <b>K2</b>                    |
| CO3            | Analyse the baseband transmission of digital data through AWGN channel                     | <b>K3</b>                    |
| CO4            | Apply various digital modulation techniques in the design of digital communication systems | <b>K3</b>                    |

Note: K1- Remember, K2- Understand, K3- Apply, K4- Analyse, K5- Evaluate, K6- Create

### CO-PO Mapping Table:

|            | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 |
|------------|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|
| <b>CO1</b> | 3   | -   | -   | -   | 2   | -   | -   | -   | -   | -    | -    | -    |
| <b>CO2</b> | 3   | -   | -   | -   | 2   | -   | -   | -   | -   | -    | -    | -    |

**SEMESTER S5**  
**CONTROL SYSTEMS**

|  |  |                    |              |
|--|--|--------------------|--------------|
| <b>Course Code</b>                         | <b>PCECT503</b>                                      | <b>CIE Marks</b>   | 40           |
| <b>Teaching Hours/Week<br/>(L: T:P: R)</b> | 3-0-0-0  | <b>ESE Marks</b>   | 60           |
| <b>Credits</b>                             | 3  | <b>Exam Hours</b>  | 2Hr. 30 Min. |
| <b>Prerequisites (if any)</b>              | GBMAT301<br>Mathematics for<br>Electrical Science -3 | <b>Course Type</b> | Theory       |

**Course Objectives:**

1. To study the elements of control system, modelling and perform stability analysis of systems.
2. To design control systems with compensating techniques.
3. To understand the state variable analysis method.

**SYLLABUS**

| <b>Module No.</b> | <b>Syllabus Description</b>  | <b>Contact Hours</b> |
|-------------------|--|----------------------|
| <b>1</b>          | <b>Introduction:</b> Basic Components of Control Systems, Open-Loop and Closed-Loop Control Systems with examples.<br><b>Mathematical modelling of control systems:</b> Electrical Systems and Mechanical translational systems.<br><b>Transfer Function:</b> Block diagram reduction techniques, Signal flow graph, Mason's gain formula.   | <b>8</b>             |
| <b>2</b>          | <b>Time Domain Analysis of Control Systems:</b> Standard Test signals, Time response of first order systems (unit impulse, step and ramp inputs) and second order systems (step input only). Time response of undamped, under damped, critically damped second order system to unit step signal, Time domain specifications for a second order underdamped system, Steady state error and static error coefficients. | <b>8</b>             |
| <b>3</b>          | <b>Stability of linear control systems:</b> Concept of BIBO stability, absolute stability, Routh Hurwitz Criterion.<br><b>Root Locus Techniques:</b> Introduction, properties and its construction.  | <b>12</b>            |

|   |  |   |
|---|--|---|
|   | <p><b>Frequency domain analysis:</b> Frequency domain specifications</p> <p><b>Relative stability:</b> gain margin and phase margin. Stability analysis using Bode plot and Nyquist stability criterion.</p> <p><b>P, PI &amp; PID controllers:</b> Introduction.</p> <p><b>Design of Compensators:</b> Need for compensators, lag and lead compensators using Bode plots(only design steps)</p> |   |
| 4 | <p><b>State Variable Analysis of Linear Systems:</b></p> <p>State variables, state equations, state variable representation of electrical systems. Transfer function from State equation, Solutions of the state equations, state transition matrix, Controllability and observability - Kalman's Test.</p>  | 8 |

**Course Assessment Method**  
(CIE: 40 marks, ESE: 60 marks)

**Continuous Internal Evaluation Marks (CIE):**

| Attendance | Assignment/<br>Microproject | Internal<br>Examination-1<br>(Written) | Internal Examination-<br>2<br>(Written) | Total |
|------------|-----------------------------|--|---|-------|
| 5          | 15                          | 10                                     | 10                                      | 40    |

**End Semester Examination Marks (ESE)**

*In Part A, all questions need to be answered and in Part B, each student can choose any one full question out of two questions*

| Part A  | Part B   | Total     |
|---|--|-----------|
| <ul style="list-style-type: none"> <li>● 2 Questions from each module.</li> <li>● Total of 8 Questions, each carrying 3 marks</li> </ul> <p style="text-align: center;"><b>(8x3 =24marks)</b></p> | <ul style="list-style-type: none"> <li>● Each question carries 9 marks.</li> <li>● Two questions will be given from each module, out of which 1 question should be answered.</li> <li>● Each question can have a maximum of 3 sub divisions.</li> </ul> <p style="text-align: center;"><b>(4x9 = 36 marks)</b></p> | <b>60</b> |

## Course Outcomes (COs)

At the end of the course students should be able to:

| Course Outcome |  | Bloom's Knowledge Level (KL) |
|----------------|--|------------------------------|
| <b>CO1</b>     | Analyze the systems using transfer function approach   | <b>K3</b>                    |
| <b>CO2</b>     | Perform time domain analysis and steady state analysis of systems  | <b>K2</b>                    |
| <b>CO3</b>     | Determine the absolute stability and relative stability of a system using Routh Hurwitz Criterion and root locus | <b>K3</b>                    |
| <b>CO4</b>     | Apply frequency domain techniques to assess the system stability and to design different compensation techniques | <b>K3</b>                    |
| <b>CO5</b>     | Analyse system Controllability and Observability using state space representation                                | <b>K3</b>                    |

Note: K1- Remember, K2- Understand, K3- Apply, K4- Analyse, K5- Evaluate, K6- Create

### CO-PO Mapping Table:

|            | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 |
|------------|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|

**SEMESTER S5**  
**DIGITAL SIGNAL PROCESSING**

|  |                               |                    |                |
|--|-------------------------------|--------------------|----------------|
| <b>Course Code</b>                         | <b>PBECT504</b>               | <b>CIE Marks</b>   | 60             |
| <b>Teaching Hours/Week<br/>(L: T:P: R)</b> | 3:0:0:1                       | <b>ESE Marks</b>   | 40             |
| <b>Credits</b>                             | 4                             | <b>Exam Hours</b>  | 2 Hrs. 30 Min. |
| <b>Prerequisites (if any)</b>              | Signals & Systems<br>PCECT402 | <b>Course Type</b> | Theory         |

**Course Objectives:**

1. To describe signals mathematically and understand how to perform mathematical operations on signals
2. To gain knowledge of Digital filters

**SYLLABUS**

| <b>Module No.</b> | <b>Syllabus Description</b>  | <b>Contact Hours</b> |
|-------------------|--|----------------------|
| <b>1</b>          | Review of sampling, Z-Transform and DTFT<br>The Discrete Fourier Transform: DFT as a linear transformation (Matrix Relation), IDFT, Properties of DFT and examples (proof not necessary).<br>Circular convolution, linear convolution using circular convolution, Filtering of long data sequences, overlap save and overlap add methods.<br>Frequency Analysis of Signals using the DFT (concept only required) | <b>9</b>             |
| <b>2</b>          | Design of FIR Filters - Symmetric and Anti-symmetric FIR Filters, Design of linear phase FIR filters using Window methods, (rectangular, Hamming and Hanning). Design of IIR Digital Filters from Analog Filters (Butterworth), IIR Filter Design by Impulse Invariance, and Bilinear Transformation, Frequency Transformations in the Analog Domain.  | <b>9</b>             |
| <b>3</b>          | Structures for the realization of Discrete-Time Systems - Block diagram and signal flow graph representations of filters.<br>FIR Filter Structures: Linear structures, Direct Form.<br>IIR Filter Structures: Direct Form, Transposed Form, Cascade Form and Parallel Form.<br>Multi-rate Digital Signal Processing:   | <b>9</b>             |

|          |  |          |
|----------|--|----------|
|          | Decimation and Interpolation (Time domain and Frequency Domain Interpretation ), Anti- aliasing and anti-imaging filter.   |          |
| <b>4</b> | Efficient Computation of DFT: Fast Fourier Transform and computational advantage over DFT, Radix-2 Decimation in Time FFT Algorithm.<br>Computer architecture for signal processing: Harvard Architecture, pipelining, MAC, Introduction to TMS320C67xx digital signal processor, Functional Block Diagram.<br>Finite word length effects in DSP systems: Introduction, fixed-point and floating-point DSP arithmetic, ADC quantization noise. | <b>9</b> |

### Suggestion on Project Topics

Projects can include but not limited to, analysing various signals/finding their transforms and designing filters for extracting different frequency components. Projects can be simulated or implemented in hardware.

### Course Assessment Method (CIE: 60 marks, ESE: 40 marks)

#### Continuous Internal Evaluation Marks (CIE):

| Attendance | Project | Internal Ex-1 | Internal Ex-2 | Total |
|------------|---------|---------------|---------------|-------|
| 5          | 30      | 12.5          | 12.5          | 60    |

#### End Semester Examination Marks (ESE)

*In Part A, all questions need to be answered and in Part B, each student can choose any one full question out of two questions*

| Part A  | Part B  | Total     |
|---|---|-----------|
| <ul style="list-style-type: none"> <li>2 Questions from each module.</li> <li>Total of 8 Questions, each carrying 2 marks<br/><b>(8x2 =16 marks)</b></li> </ul> | <ul style="list-style-type: none"> <li>2 questions will be given from each module, out of which 1 question should be answered. Each question can have a maximum of 2 sub divisions. Each question carries 6 marks.<br/><b>(4x6 = 24 marks)</b></li> </ul> | <b>40</b> |

## Course Outcomes (COs)

At the end of the course students should be able to:

| Course Outcome |   | Bloom's Knowledge Level (KL) |
|----------------|---|------------------------------|
| <b>CO1</b>     | Illustrate fundamental properties and relations relevant to DFT and solve basic problems involving DFT-based filtering methods. | <b>K2</b>                    |
| <b>CO2</b>     | Design linear phase FIR filters and IIR filters of different specifications.  | <b>K3</b>                    |
| <b>CO3</b>     | Realise the various FIR and IIR filter structures for a given system function.  | <b>K3</b>                    |
| <b>CO4</b>     | Compute DFT efficiently using FFT method and to explain the architecture of a DSP processor.                                    | <b>K2</b>                    |

Note: K1- Remember, K2- Understand, K3- Apply, K4- Analyse, K5- Evaluate, K6- Create

### CO-PO Mapping Table:

|            | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 |

### Assessment and Evaluation for Project Activity

| Sl. No       | Evaluation for  | Allotted<br>Marks |
|--------------|---|-------------------|
| 1            | Project Planning and Proposal                                       | 5                 |
| 2            | Contribution in Progress Presentations and Question Answer Sessions | 4                 |
| 3            | Involvement in the project work and Team Work                       | 3                 |
| 4            | Execution and Implementation  | 10                |
| 5            | Final Presentations   | 5                 |
| 6            | Project Quality, Innovation and Creativity                          | 3                 |
| <b>Total</b> |   | <b>30</b>         |

**1. Project Planning and Proposal (5 Marks)**

- Clarity and feasibility of the project plan
- Research and background understanding
- Defined objectives and methodology

**2. Contribution in Progress Presentation and Question Answer Sessions (4 Marks)**

- Individual contribution to the presentation
- Effectiveness in answering questions and handling feedback

**3. Involvement in the Project Work and Team Work (3 Marks)**

- Active participation and individual contribution
- Teamwork and collaboration

**4. Execution and Implementation (10 Marks)**

- Adherence to the project timeline and milestones
- Application of theoretical knowledge and problem-solving
- Final Result

**5. Final Presentation (5 Marks)**

- Quality and clarity of the overall presentation
- Individual contribution to the presentation
- Effectiveness in answering questions

**6. Project Quality, Innovation, and Creativity (3 Marks)**

- Overall quality and technical excellence of the project
- Innovation and originality in the project
- Creativity in solutions and approaches

**SEMESTER S5**  
**BIOMEDICAL ENGINEERING**

|  |                 |                    |                |
|--|-----------------|--------------------|----------------|
| <b>Course Code</b>                         | <b>PEECT521</b> | <b>CIE Marks</b>   | 40             |
| <b>Teaching Hours/Week<br/>(L: T:P: R)</b> | 3-0-0-0         | <b>ESE Marks</b>   | 60             |
| <b>Credits</b>                             | 3               | <b>Exam Hours</b>  | 2 Hrs. 30 min. |
| <b>Prerequisites (if any)</b>              | None            | <b>Course Type</b> | Theory         |

**Course Objectives:**

1. This course will introduce the various aspects of biomedical engineering and its applications described using engineering principles
2. The student will be able to understand the techniques and uses of modern diagnostic and therapeutic equipment.

**SYLLABUS**

| <b>Module No.</b> | <b>Syllabus Description</b>  | <b>Contact Hours</b> |
|-------------------|--|----------------------|
| <b>1</b>          | Introduction to bio-medical engineering,<br>Sources of bio-electric potential: Resting and action potential, propagation of action potentials. Various bioelectric potentials (ECG, EEG, EMG, ERG, EOG, EGG concept only.)<br>Electrode theory: Nernst equation, Electrode skin interface<br>Bio-potential electrodes: Microelectrodes, skin surface electrodes, needle electrodes<br>Bio-potential amplifiers: instrumentation amplifiers, carrier amplifiers, isolation amplifiers, chopper amplifiers | <b>9</b>             |
| <b>2</b>          | Heart and cardiovascular system: electro conduction system of the heart, ECG lead configurations, Einthoven triangle, Electrocardiography, ECG machine - block diagram, ECG recording system.<br>The human nervous system: Neurons, action potential of brain, brain waves, placement of electrodes, EEG recording, evoked potential,  | <b>9</b>             |

|          |   |          |
|----------|---|----------|
|          | Electrical activity of muscles: EMG signal acquisition and analysis. Myoelectric control system. Electrical stimulation of the muscle and nerve, Applications of EMG  |          |
| <b>3</b> | Instruments for clinical laboratory: Oxymeters, blood cell counter, flame photometer, Spectrophotometer<br>Therapeutic Equipments: Principles, block schematic diagram, working and applications of pacemakers, cardiac defibrillators, heart–lung machine, dialyzers, surgical diathermy equipment, ventilators<br>Biomedical Telemetry system: Components of biotelemetry system, application of telemetry in medicine, single channel telemetry system for ECG.  | <b>9</b> |
| <b>4</b> | Medical Imaging systems (Basic Principle only): X-ray imaging - X-ray machine, applications of X-rays in medicine.<br>Computed Tomography: Principle, image reconstruction, scanning system and applications<br>Ultrasonic imaging systems: Basic pulse echo system, Different types of Ultrasonics systems:, A-Scan, B-Scan, M-Scan, applications, real-time ultrasonic imaging systems and probes.<br>Magnetic Resonance Imaging – Basic NMR components, Biological effects and advantages of NMR imaging | <b>9</b> |

**Course Assessment Method**  
(CIE: 40 marks , ESE: 60 marks)

**Continuous Internal Evaluation Marks (CIE):**

| <b>Attendance</b> | <b>Assignment/<br/>Microproject</b> | <b>Internal<br/>Examination-1<br/>(Written)</b> | <b>Internal<br/>Examination- 2<br/>(Written )</b> | <b>Total</b> |
|-------------------|-------------------------------------|---|---|--------------|
| <b>5</b>          | <b>15</b>                           | <b>10</b>                                       | <b>10</b>   | <b>40</b>    |

## End Semester Examination Marks (ESE)

*In Part A, all questions need to be answered and in Part B, each student can choose any one full question out of two questions*

| <b>Part A</b>  | <b>Part B</b>  | <b>Total</b> |
|--|--|--------------|
| <ul style="list-style-type: none"><li>• 2 Questions from each module.</li><li>• Total of 8 Questions, each carrying 3 marks</li></ul> <p><b>(8x3 =24marks)</b></p> | <ul style="list-style-type: none"><li>• Each question carries 9 marks.</li><li>• Two questions will be given from each module, out of which 1 question should be answered.</li><li>• Each question can have a maximum of 3 sub divisions.</li></ul> <p><b>(4x9 = 36 marks)</b></p> | <b>60</b>    |

## Course Outcomes (COs)

At the end of the course students should be able to:

| <b>Course Outcome</b> |  | <b>Bloom's Knowledge Level (K)</b> |
|-----------------------|--|------------------------------------|
| <b>CO1</b>            | Outline the basic bioelectric potentials and their implications in diagnostics                       | <b>K2</b>                          |
| <b>CO2</b>            | Summarize the principles used for diagnosis of abnormalities in the cardiovascular system            | <b>K2</b>                          |
| <b>CO3</b>            | Identify the techniques used for diagnosis and therapy in the neuromuscular and myoelectric systems. | <b>K2</b>                          |
| <b>CO4</b>            | Illustrate the principle and working of different types of bio medical equipment/devices             | <b>K2</b>                          |
| <b>CO5</b>            | State various diagnostic medical imaging techniques.   | <b>K2</b>                          |

Note: K1- Remember, K2- Understand, K3- Apply, K4- Analyse, K5- Evaluate, K6- Create

**CO-PO Mapping Table:**

|     | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 |
|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|
| CO1 | 3   |     |     |     |     | 2   |     |     |     |      |      | 2    |
| CO2 | 3   |     |     |     |     | 2   |     |     |     |      |      | 2    |
| CO3 | 3   |     |     |     |     | 2   | 2   |     |     |      |      | 2    |
| CO4 | 3   |     |     |     |     | 2   | 2   |     |     |      |      | 2    |
| CO5 | 3   |     |     |     |     | 2   | 2   |     |     |      |      | 2    |

| <b>Text Books</b> |  |  |                       |                   |
|-------------------|--|--|-----------------------|-------------------|

**SEMESTER S5**  
**DATA STRUCTURES**

|  |                        |                    |               |
|--|------------------------|--------------------|---------------|
| <b>Course Code</b>                         | <b>PEECT522</b>        | <b>CIE Marks</b>   | 40            |
| <b>Teaching Hours/Week<br/>(L: T:P: R)</b> | 3:0:0:0                | <b>ESE Marks</b>   | 60            |
| <b>Credits</b>                             | 3                      | <b>Exam Hours</b>  | 2 Hr. 30 Min. |
| <b>Prerequisites (if any)</b>              | None/<br>(Course code) | <b>Course Type</b> | Theory        |

**Course Objectives:**

1. To familiarise with different data structures and the techniques involved.

**SYLLABUS**

| <b>Module No.</b> | <b>Syllabus Description</b>  | <b>Contact Hours</b> |
|-------------------|--|----------------------|
| <b>1</b>          | Basic Concepts of Data Structures: Algorithms, Performance Analysis, Space Complexity, Time Complexity, Asymptotic Notations<br>Arrays: Linear Search and Binary Search, Stacks, Queues-Circular Queues, Priority Queues, Double Ended Queues, Evaluation of Expressions     | <b>9</b>             |
| <b>2</b>          | Linked List: Self-Referential Structures, Dynamic Memory Allocation, Singly Linked List- Operations on Linked List. Doubly Linked List, Circular Linked List, Stacks and Queues using Linked List, Polynomial representation using Linked List                               | <b>9</b>             |
| <b>3</b>          | Trees and Graphs: Trees, Binary Trees-Tree Operations, Binary Tree Representation, Tree Traversals, Binary Search<br>Trees- Binary Search Tree Operations<br>Graphs, Representation of Graphs, Depth First Search and Breadth First Search on Graphs, Applications of Graphs | <b>9</b>             |
| <b>4</b>          | Sorting and Hashing: Sorting Techniques – Selection Sort, Insertion Sort, Quick Sort, Merge Sort and Heap Sort<br>Hashing- Hashing Techniques, Collision Resolution, Overflow handling, Hashing functions – Mid square, Division, Folding, Digit Analysis                    | <b>9</b>             |

**Course Assessment Method**  
(CIE: 40 marks, ESE: 60 marks)

**Continuous Internal Evaluation Marks (CIE):**

| Attendance | Assignment/<br>Microproject | Internal<br>Examination-1<br>(Written) | Internal<br>Examination- 2<br>(Written ) | Total     |
|------------|-----------------------------|--|--|-----------|
| <b>5</b>   | <b>15</b>                   | <b>10</b>                              | <b>10</b>                                | <b>40</b> |

**End Semester Examination Marks (ESE)**

*In Part A, all questions need to be answered and in Part B, each student can choose any one full question out of two questions*

| Part A  | Part B   | Total     |
|---|--|-----------|
| <ul style="list-style-type: none"> <li>• 2 Questions from each module.</li> <li>• Total of 8 Questions, each carrying 3 marks</li> </ul> <p style="text-align: center;"><b>(8x3 =24marks)</b></p> | <ul style="list-style-type: none"> <li>• Each question carries 9 marks.</li> <li>• Two questions will be given from each module, out of which 1 question should be answered.</li> <li>• Each question can have a maximum of 3 sub divisions.</li> </ul> <p style="text-align: center;"><b>(4x9 = 36 marks)</b></p> | <b>60</b> |

**Course Outcomes (COs)**

At the end of the course students should be able to:

| Course Outcome |  | Bloom's<br>Knowledge<br>Level (KL) |
|----------------|--|------------------------------------|
| <b>CO1</b>     | Compare performance of algorithms using asymptotic notations   | <b>K2</b>                          |
| <b>CO2</b>     | Solve real world problems efficiently using appropriate data structures like arrays, linked list, stacks and queues. | <b>K3</b>                          |
| <b>CO3</b>     | Make use of nonlinear data structures like trees and graphs to design algorithms for various applications.           | <b>K3</b>                          |
| <b>CO4</b>     | Apply and compare various techniques for searching and sorting.  | <b>K3</b>                          |
| <b>CO5</b>     | Apply appropriate hash function to store and access a given dataset  | <b>K3</b>                          |

Note: K1- Remember, K2- Understand, K3- Apply, K4- Analyse, K5- Evaluate, K6- Create

**CO-PO Mapping Table (Mapping of Course Outcomes to Program Outcomes)**

## SEMESTER S5

### SENSORS AND ACTUATORS

|  |                  |                    |                |
|--|------------------|--------------------|----------------|
| <b>Course Code</b>                         | <b>PEECT 523</b> | <b>CIE Marks</b>   | 40             |
| <b>Teaching Hours/Week<br/>(L: T:P: R)</b> | 3:0:0:0          | <b>ESE Marks</b>   | 60             |
| <b>Credits</b>                             | 3                | <b>Exam Hours</b>  | 2 Hrs. 30 min. |
| <b>Prerequisites (if any)</b>              | None             | <b>Course Type</b> | Theory         |

#### Course Objectives:

1. The course on Sensors and Actuators typically aims to provide students with comprehensive knowledge in the principles, design, and application of various sensors and actuators used in real-world applications

### SYLLABUS

| <b>Module No.</b> | <b>Syllabus Description</b>  | <b>Contact Hours</b> |
|-------------------|--|----------------------|
| <b>1</b>          | <b>Introduction to Sensors and actuators:</b> Block diagram of a closed loop control System, Sensors and Transducers, Sensors Classification, Sensor Characteristics - Transfer Function, Calibration, Span (Full Scale Input), Full-Scale Output, Accuracy, Precision, Hysteresis, Nonlinearity, Saturation, Repeatability, Dead Band, Sensitivity, Resolution.   | <b>9</b>             |
| <b>2</b>          | Position and Displacement Sensors - Potentiometric Sensors, Capacitive Sensors, LVDT, Hall Effect Sensors<br>Pressure Sensors -Mercury Pressure Sensor, Bellows, Membranes, and Thin plates, Piezoresistive Sensors, Capacitive Sensors.<br>Force, Strain, and Tactile Sensors - Strain Gauges, Tactile Sensors - Switch Sensors, Piezoelectric Sensors, Piezoresistive Sensors, Capacitive Touch Sensors, Acoustic Touch Sensors, Optical Touch Sensors, Piezoelectric Force Sensors. | <b>9</b>             |
| <b>3</b>          | Flow Sensors - Ultrasonic Flow Sensors, Electromagnetic Flow Sensors.<br>Temperature Sensors - Resistance Temperature Detectors, Thermistors, Thermocouple.  | <b>9</b>             |

|          |  |          |
|----------|--|----------|
|          | Proximity Sensors - PIR sensors. Ultrasonic proximity sensors.<br>Smart Sensors - Block Diagram, Difference between Normal Sensor & Smart Sensor, Advantages, Disadvantages and Applications.  |          |
| <b>4</b> | <b>Actuators:</b> - Definition- classification-Electric, Hydraulic, Pneumatic actuators.<br>Hydraulic System - Physical Components and typical circuit. Hydraulic actuators - Linear actuators, Rotary actuators - Gear motor, vane motor.<br>Pneumatic System - Components and typical circuit. Pneumatic Actuators - Bellows actuator, Flapper-nozzle, Diaphragm actuators for industrial control valves.<br>Electric actuators- Solenoids, Stepper motors, DC motors, DC servo motors.<br>Electro-Pneumatic actuator; rotary output actuators, Linear output actuators. | <b>9</b> |

**Course Assessment Method**  
(CIE: 40 marks, ESE: 60 marks)

**Continuous Internal Evaluation Marks (CIE):**

| <b>Attendance</b> | <b>Assignment/<br/>Microproject</b> | <b>Internal<br/>Examination-1<br/>(Written)</b> | <b>Internal<br/>Examination- 2<br/>(Written )</b> | <b>Total</b> |
|-------------------|-------------------------------------|---|---|--------------|
| <b>5</b>          | <b>15</b>                           | <b>10</b>                                       | <b>10</b>   | <b>40</b>    |

**End Semester Examination Marks (ESE)**

*In Part A, all questions need to be answered and in Part B, each student can choose any one full question out of two questions*

| <b>Part A</b>  | <b>Part B</b>  | <b>Total</b> |
|--|--|--------------|
| <ul style="list-style-type: none"> <li>● 2 Questions from each module.</li> <li>● Total of 8 Questions, each carrying 3 marks</li> </ul> <p style="text-align: center;"><b>(8x3 =24 marks)</b></p> | <ul style="list-style-type: none"> <li>● Each question carries 9 marks.</li> <li>● Two questions will be given from each module, out of which 1 question should be answered.</li> <li>● Each question can have a maximum of 3 sub divisions.</li> </ul> <p style="text-align: center;"><b>(4x9 = 36 marks)</b></p> | <b>60</b>    |

## Course Outcomes (COs)

At the end of the course students should be able to:

| Course Outcome |  | Bloom's Knowledge Level (KL) |
|----------------|--|------------------------------|
| CO1            | Describe Sensor Fundamentals   | <b>K2</b>                    |
| CO2            | Explain the basic principles and concepts of commonly used different types of sensors, including their purpose, how they work, and the various types of sensors available. | <b>K2</b>                    |
| CO3            | Illustrate the working principles of smart sensors   | <b>K2</b>                    |
| CO4            | Explain the working principle of different types of actuators.   | <b>K2</b>                    |

Note: K1- Remember, K2- Understand, K3- Apply, K4- Analyse, K5- Evaluate, K6- Create

### CO-PO Mapping Table:

|            | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 |
|------------|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|

## SEMESTER S5

### ARM ARCHITECTURE AND PROGRAMMING

|  |                  |                    |                |
|--|------------------|--------------------|----------------|
| <b>Course Code</b>                         | <b>PEECT524</b>  | <b>CIE Marks</b>   | 40             |
| <b>Teaching Hours/Week<br/>(L: T:P: R)</b> | 3:0:0:0          | <b>ESE Marks</b>   | 60             |
| <b>Credits</b>                             | 3                | <b>Exam Hours</b>  | 2 Hrs. 30 Min. |
| <b>Prerequisites (if any)</b>              | Programming in C | <b>Course Type</b> | Theory         |

#### Course Objectives:

1. To introduce ARM Cortex M programming in assembly and C
2. To lay the foundation for practical embedded system design

### SYLLABUS

| <b>Module No.</b> | <b>Syllabus Description</b>  | <b>Contact Hours</b> |
|-------------------|--|----------------------|
| <b>1</b>          | Embedded C: Fixed-width integer data types in C99, boolean type, mixing types, manipulating bits in memory and IO ports, accessing memory mapped IO using pointers, structures, packed structures, bit fields, casting address of an object, unions.<br>[1] Ch. 4<br>Review of computer organization: Memory, CPU, IO, Introduction to Arm cortex M architecture: Internal organization-general purpose and special registers, instruction pipelining, memory model, bit banding, Arm assembly language instruction format and operands<br>[1] Ch. 5 | <b>9</b>             |
| <b>2</b>          | Arm assembly language programming: Loading constants into registers, loading memory data into registers, storing data from registers to memory, converting C assignment statements to assembly, memory address calculations, Memory addressing examples: translating C pointer expressions to assembly, translating C subscript expressions to assembly, translating structure references to assembly, Stack instructions, data processing instructions: updating flags in APSR, arithmetic instructions, bit  | <b>9</b>             |

|          |   |          |
|----------|---|----------|
|          | manipulation instructions, shift instructions, bit field manipulation instructions<br>[1] Ch. 6   |          |
| <b>3</b> | Control structures in assembly language: instruction sequencing, conditional branch instructions, translating if-then and if-then-else statements to assembly, compound conditionals, implementing loops, speeding up array access, Implementing functions: function call and return, register usage, parameter passing, return values, temporary variables, preserving registers<br>[1] Ch. 7.   | <b>9</b> |
| <b>4</b> | IO programming in assembly: Interrupts and exceptions, thread and handler modes, entering the exception handler, returning from exception handler, latency reduction techniques, priorities and nested exceptions, synchronization, transfer rate and latency, buffers and queues, double buffering, polled waiting loops, interrupt driven IO, DMA<br>[1] Ch. 8.<br>System initialization: Memory layout, cpu and vector table, C run-time environment, System Timer<br>[1] Ch. 13 | <b>9</b> |

**Course Assessment Method**  
**(CIE: 40 marks, ESE: 60 marks)**

**Continuous Internal Evaluation Marks (CIE):**

| <b>Attendance</b> | <b>Assignment/<br/>Microproject</b> | <b>Internal<br/>Examination-1<br/>(Written)</b> | <b>Internal<br/>Examination- 2<br/>(Written )</b> | <b>Total</b> |
|-------------------|-------------------------------------|---|---|--------------|
| <b>5</b>          | <b>15</b>                           | <b>10</b>                                       | <b>10</b>   | <b>40</b>    |

**End Semester Examination Marks (ESE)**

*In Part A, all questions need to be answered and in Part B, each student can choose any one full question out of two questions*

| Part A   | Part B   | Total     |
|--|--|-----------|
| <ul style="list-style-type: none"> <li>• 2 Questions from each module.</li> <li>• Total of 8 Questions, each carrying 3 marks</li> </ul> <p style="text-align: center;"><b>(8x3 =24 marks)</b></p> | <ul style="list-style-type: none"> <li>• Each question carries 9 marks.</li> <li>• Two questions will be given from each module, out of which 1 question should be answered.</li> <li>• Each question can have a maximum of 3 sub divisions.</li> </ul> <p style="text-align: center;"><b>(4x9 = 36 marks)</b></p> | <b>60</b> |

### Course Outcomes (COs)

At the end of the course students should be able to:

| Course Outcome |   | Bloom's Knowledge Level (KL) |
|----------------|---|------------------------------|
| <b>CO1</b>     | Use the features of C that are frequently used in embedded systems      | <b>K3</b>                    |
| <b>CO2</b>     | Explain a programmer's view of processor architecture                   | <b>K2</b>                    |
| <b>CO3</b>     | Choose between programming at the level of assembly or C as appropriate | <b>K3</b>                    |

Note: K1- Remember, K2- Understand, K3- Apply, K4- Analyse, K5- Evaluate, K6- Create

### CO-PO Mapping Table (Mapping of Course Outcomes to Program Outcomes)

|            | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 |
|------------|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|
| <b>CO1</b> | 3   | 2   | 3   | 2   |     |     |     |     |     |      |      |      |
| <b>CO2</b> | 3   | 2   | 3   | 2   |     |     |     |     |     |      |      |      |
| <b>CO3</b> | 3   | 2   | 3   | 2   |     |     |     |     |     |      |      |      |

Note: 1: Slight (Low), 2: Moderate (Medium), 3: Substantial (High), -: No Correlation

## SEMESTER S5

### HIGH SPEED DIGITAL DESIGN

|  |                      |                    |                |
|--|----------------------|--------------------|----------------|
| <b>Course Code</b>                         | <b>PEECT526</b>      | <b>CIE Marks</b>   | 40             |
| <b>Teaching Hours/Week<br/>(L: T:P: R)</b> | 3:0:0:0              | <b>ESE Marks</b>   | 60             |
| <b>Credits</b>                             | 3                    | <b>Exam Hours</b>  | 2 Hrs. 30 Min. |
| <b>Prerequisites (if any)</b>              | BASIC<br>ELECTRONICS | <b>Course Type</b> | Theory         |

#### Course Objectives:

1. To understand the fundamentals of the effects of passive circuit elements on signal propagation in high speed digital circuits
2. To understand the high speed properties of logic gates and the measurement techniques at high frequencies
3. To analyse the effects of wiring, source, and load on the signal propagation from one end of a circuit to the other end
4. To design the power supply and clock distribution circuits for high speed devices,

#### SYLLABUS

| <b>Module No.</b> | <b>Syllabus Description</b>  | <b>Contact Hours</b> |
|-------------------|--|----------------------|
| 1                 | <b>High Speed Digital Design:</b> Fundamentals: Frequency and time, Time and distance, Lumped versus distributed systems, four kinds of reactance-ordinary capacitance and inductance, mutual capacitance and inductance, Relation of mutual capacitance and mutual inductance to cross talk.  | 9                    |
| 2                 | <b>High Speed properties of Logic gates:</b> Power, Quiescent vs active dissipation, Active power driving a capacitive load, Active power due to overlapping bias currents, Input power, Speed, Packaging (Power dissipation analysis of only CMOS logic gates are required)<br><b>Measurement Techniques:</b> Rise time and bandwidth of oscilloscope probes, self inductance of probe ground loop, spurious signal pick up from probe ground loops, special probing fixtures, Avoiding pickup from probe shield currents, slowing down of a system clock, observing metastable states. | 9                    |

|          |  |          |
|----------|--|----------|
| <b>3</b> | <p><b>Transmission Lines:</b> Problems of point to point wiring, signal distortion, EMI, cross talk. Infinite Uniform transmission line; ideal distortion less lossless transmission line, RC transmission line, Skin effect, Proximity effect, Dielectric loss. Effects of source and load impedance. Termination: End terminator, Source terminators, middle terminators, AC biasing for end terminators, Resistor selection, Cross talk in terminators.</p> | <b>9</b> |
| <b>4</b> | <p><b>Power system:</b> Stable voltage reference, Uniform voltage distribution, distribution problems, choosing a bypass capacitor.</p> <p><b>Clock Distribution:</b> Timing margin, Clock skew, Using low impedance drivers, using low impedance distribution lines, delay adjustments, Differential distribution, Clock signal duty cycle, Decoupling clock receivers from the clock bus. Clock Oscillators, Canned clock oscillator, Clock Jitter.</p>      | <b>9</b> |

**Course Assessment Method**  
(CIE: 40 marks, ESE: 60 marks)

**Continuous Internal Evaluation Marks (CIE):**

| Attendance | Assignment/<br>Microproject | Internal<br>Examination-1<br>(Written) | Internal<br>Examination- 2<br>(Written ) | Total     |
|------------|-----------------------------|--|--|-----------|
| <b>5</b>   | <b>15</b>                   | <b>10</b>                              | <b>10</b>                                | <b>40</b> |

**End Semester Examination Marks (ESE)**

*In Part A, all questions need to be answered and in Part B, each student can choose any one full question out of two questions*

| Part A   | Part B   | Total     |
|--|--|-----------|
| <ul style="list-style-type: none"> <li>● 2 Questions from each module.</li> <li>● Total of 8 Questions, each carrying 3 marks</li> </ul> <p style="text-align: center;"><b>(8x3 =24 marks)</b></p> | <ul style="list-style-type: none"> <li>● Each question carries 9 marks.</li> <li>● Two questions will be given from each module, out of which 1 question should be answered.</li> <li>● Each question can have a maximum of 3 sub divisions.</li> </ul> <p style="text-align: center;"><b>(4x9 = 36 marks)</b></p> | <b>60</b> |

## Course Outcomes (COs)

At the end of the course students should be able to:

| Course Outcome |   | Bloom's Knowledge Level (KL) |
|----------------|---|------------------------------|
| <b>CO1</b>     | Illustrate the fundamentals of the effects of passive circuit elements on signal propagation in high speed digital circuits | <b>K2</b>                    |
| <b>CO2</b>     | Describe the high speed properties of logic gates and the measurement techniques at high frequencies                        | <b>K2</b>                    |
| <b>CO3</b>     | Analyze the effects of wiring, source, and load on the signal propagation from one end of a circuit to the other end        | <b>K3</b>                    |
| <b>CO4</b>     | Design the power supply and clock distribution circuits for high speed devices  | <b>K3</b>                    |

Note: K1- Remember, K2- Understand, K3- Apply, K4- Analyse, K5- Evaluate, K6- Create

### CO-PO Mapping Table (Mapping of Course Outcomes to Program Outcomes)

## SEMESTER S5

### ESTIMATION AND DETECTION

|  |                        |                    |                |
|--|------------------------|--------------------|----------------|
| <b>Course Code</b>                         | <b>PEECT527</b>        | <b>CIE Marks</b>   | 40             |
| <b>Teaching Hours/Week<br/>(L: T:P: R)</b> | 3:0:0:0                | <b>ESE Marks</b>   | 60             |
| <b>Credits</b>                             | 3                      | <b>Exam Hours</b>  | 2 Hrs. 30 Min. |
| <b>Prerequisites (if any)</b>              | None/<br>(Course code) | <b>Course Type</b> | Theory         |

#### Course Objectives:

1. This course aims to impart the fundamentals of statistical signal processing theory in engineering applications.

#### SYLLABUS

| <b>Module No.</b> | <b>Syllabus Description</b>   | <b>Contact Hours</b> |
|-------------------|---|----------------------|
| <b>1</b>          | <b>Statistical Estimation Theory I</b><br>Fundamentals of estimation theory, the mathematical estimation problem, Minimum variance unbiased estimation, basics of Cramer-Rao Lower Bound, linear models, best linear unbiased estimation, application examples.   | <b>9</b>             |
| <b>2</b>          | <b>Statistical Estimation Theory II</b><br>Maximum likelihood estimation, least squares, Bayesian philosophy, minimum mean square error estimation, application examples.   | <b>9</b>             |
| <b>3</b>          | <b>Statistical Detection Theory I</b><br>Fundamentals of detection theory, the mathematical detection problem, Hypothesis testing, classical approach, Neyman-Pearson theorem, likelihood ratio test, receiver operating characteristics, Bayesian approach, minimum probability of error, Bayes risk, multiple hypothesis testing. | <b>10</b>            |
| <b>4</b>          | <b>Statistical Detection Theory II</b><br>Detection of deterministic signals, matched filters, detection of random signals, estimator-correlator, linear model, application examples.   | <b>8</b>             |

**Course Assessment Method**  
(CIE: 40 marks , ESE: 60 marks)

**Continuous Internal Evaluation Marks (CIE):**

| Attendance | Assignment/<br>Microproject | Internal<br>Examination-1<br>(Written) | Internal<br>Examination- 2<br>(Written ) | Total |
|------------|-----------------------------|--|--|-------|
| 5          | 15                          | 10                                     | 10                                       | 40    |

**End Semester Examination Marks (ESE)**

*In Part A, all questions need to be answered and in Part B, each student can choose any one full question out of two questions*

| Part A  | Part B   | Total     |
|---|--|-----------|
| <ul style="list-style-type: none"> <li>• 2 Questions from each module.</li> <li>• Total of 8 Questions, each carrying 3 marks</li> </ul> <p style="text-align: center;"><b>(8x3 =24marks)</b></p> | <ul style="list-style-type: none"> <li>• Each question carries 9 marks.</li> <li>• Two questions will be given from each module, out of which 1 question should be answered.</li> <li>• Each question can have a maximum of 3 sub divisions.</li> </ul> <p style="text-align: center;"><b>(4x9 = 36 marks)</b></p> | <b>60</b> |

**Course Outcomes (COs)**

At the end of the course students should be able to:

| Course Outcome |   | Bloom's<br>Knowledge<br>Level (KL) |
|----------------|---|------------------------------------|
| <b>CO1</b>     | Summarize the fundamentals of statistical estimation principles used in various engineering problems. | <b>K2</b>                          |
| <b>CO2</b>     | Apply different types of estimation algorithms in engineering applications.                           | <b>K3</b>                          |
| <b>CO3</b>     | Illustrate the fundamentals of statistical detection principles used in various engineering problems. | <b>K2</b>                          |
| <b>CO4</b>     | Apply various types of statistical decision rules in engineering applications.                        | <b>K3</b>                          |

Note: K1- Remember, K2- Understand, K3- Apply, K4- Analyse, K5- Evaluate, K6- Create

**CO-PO Mapping Table:**

|     | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 |
|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|
| CO1 | 3   |     |     |     |     |     |     |     |     |      |      | 2    |
| CO2 | 3   | 3   | 3   | 3   | 3   |     |     |     |     |      |      | 2    |
| CO3 | 3   |     |     |     |     |     |     |     |     |      |      | 2    |

## SEMESTER S5

### ARM ARCHITECTURE, PROGRAMMING AND INTERFACING

|  |                 |                    |               |
|--|-----------------|--------------------|---------------|
| <b>Course Code</b>                         | <b>PEECT525</b> | <b>CIE Marks</b>   | 40            |
| <b>Teaching Hours/Week<br/>(L: T:P: R)</b> | 3:0:0:0         | <b>ESE Marks</b>   | 60            |
| <b>Credits</b>                             | 5/3             | <b>Exam Hours</b>  | 2 Hrs.30 Min. |
| <b>Prerequisites (if any)</b>              | None            | <b>Course Type</b> | Theory        |

#### Course Objectives:

1. To introduce ARM Cortex M programming in assembly and C
2. To lay the foundation for practical embedded system design

### SYLLABUS

| <b>Module No.</b> | <b>Syllabus Description</b>  | <b>Contact Hours</b> |
|-------------------|--|----------------------|
| <b>1</b>          | Embedded C: Fixed-width integer data types in C99, boolean type, mixing types, manipulating bits in memory and IO ports, accessing memory mapped IO using pointers, structures, packed structures, bit fields, casting address of an object, unions.<br>[1] Ch. 4<br>Review of computer organization: Memory, CPU, IO, Introduction to Arm cortex M architecture: Internal organization-general purpose and special registers, instruction pipelining, memory model, bit banding, Arm assembly language instruction format and operands<br>[1] Ch. 5 | <b>9</b>             |
| <b>2</b>          | Arm assembly language programming: Loading constants into registers, loading memory data into registers, storing data from registers to memory, converting C assignment statements to assembly, memory address calculations, Memory addressing examples: translating C pointer expressions to assembly, translating C subscript expressions to assembly, translating structure references to assembly, Stack instructions, data processing   | <b>9</b>             |

|          |   |          |
|----------|---|----------|
|          | instructions: updating flags in APSR, arithmetic instructions, bit manipulation instructions, shift instructions, bit field manipulation instructions<br>[1] Ch. 6  |          |
| <b>3</b> | Control structures in assembly language: instruction sequencing, conditional branch instructions, translating if-then and if-then-else statements to assembly, compound conditionals, implementing loops, speeding up array access, Implementing functions: function call and return, register usage, parameter passing, return values, temporary variables, preserving registers<br>[1] Ch. 7.   | <b>9</b> |
| <b>4</b> | IO programming in assembly: Interrupts and exceptions, thread and handler modes, entering the exception handler, returning from exception handler, latency reduction techniques, priorities and nested exceptions, synchronization, transfer rate and latency, buffers and queues, double buffering, polled waiting loops, interrupt driven IO, DMA<br>[1] Ch. 8.<br>System initialization: Memory layout, cpu and vector table, C run-time environment, System Timer<br>[1] Ch. 13 | <b>9</b> |

### **Course Assessment Method**

**(CIE: 40 marks, ESE: 60 marks)**

#### **Continuous Internal Evaluation Marks (CIE):**

| <b>Attendance</b> | <b>Internal Ex</b> | <b>Evaluate</b> | <b>Analyse</b> | <b>Total</b> |
|-------------------|--------------------|-----------------|----------------|--------------|
| <b>5</b>          | <b>15</b>          | <b>10</b>       | <b>10</b>      | <b>40</b>    |

#### **Criteria for Evaluation (Evaluate and Analyse): 20 marks**

Interfacing experiments on Arm Microcontroller boards TM4C123G/ STM32 Nucleo

GPIO – push button, LED, keypad scan ([2] Ch. 14)

Toggling LED using timers ([2] Ch. 15)

Stepper motor control ([2] Ch. 16)

LCD interfacing ([2] Ch. 17)

ADC and DAC with DMA ([2] Ch. 19, 20, 21)

Serial Communication ([2] Ch. 22)

Course Project involving the design and implementation of an embedded system for a chosen application

Project phases: Proposal, Implementation, Testing, Final Report, Presentations and Viva Voce

### End Semester Examination Marks (ESE):

*In Part A, all questions need to be answered and in Part B, each student can choose any one full question out of two questions*

| Part A  | Part B   | Total     |
|---|--|-----------|
| <ul style="list-style-type: none"><li>• 2 Questions from each module.</li><li>• Total of 8 Questions, each carrying 3 marks</li></ul> <b>(8x3 =24marks)</b> | 2 questions will be given from each module, out of which 1 question should be answered. Each question can have a maximum of 3 sub divisions. Each question carries 9 marks.<br><b>(4x9 = 36 marks)</b> | <b>60</b> |

### Course Outcomes (COs)

At the end of the course students should be able to:

| Course Outcome |   | Bloom's Knowledge Level (KL) |
|----------------|---|------------------------------|
| <b>CO1</b>     | Use the features of C that are frequently used in embedded systems      | <b>K3</b>                    |
| <b>CO2</b>     | Explain a programmer's view of processor architecture                   | <b>K2</b>                    |
| <b>CO3</b>     | Choose between programming at the level of assembly or C as appropriate | <b>K3</b>                    |
| <b>CO4</b>     | Analyze the interfacing of peripherals                                  | <b>K4</b>                    |

Note: K1- Remember, K2- Understand, K3- Apply, K4- Analyse, K5- Evaluate, K6- Create

### CO-PO Mapping Table (Mapping of Course Outcomes to Program Outcomes)

|            | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 |
|------------|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|
| <b>CO1</b> | 3   |     |     |     |     |     |     |     |     |      |      | 2    |
| <b>CO2</b> | 3   |     | 3   | 3   |     |     |     |     |     |      |      | 2    |
| <b>CO3</b> | 3   |     | 3   | 3   |     |     |     |     |     |      |      | 2    |
| <b>CO4</b> | 3   |     | 3   | 3   |     |     |     |     |     |      |      | 2    |

Note: 1: Slight (Low), 2: Moderate (Medium), 3: Substantial (High), -: No Correlation

| <b>Text Books</b> |   |                      |                       |                  |

## SEMESTER S5

### DIGITAL SIGNAL PROCESSING LAB

|  |                           |                    |                |
|--|---------------------------|--------------------|----------------|
| <b>Course Code</b>                         | <b>PBECL507</b>           | <b>CIE Marks</b>   | 50             |
| <b>Teaching Hours/Week<br/>(L: T:P: R)</b> | 0:0:3:0                   | <b>ESE Marks</b>   | 50             |
| <b>Credits</b>                             | 2                         | <b>Exam Hours</b>  | 2 Hrs. 30 Min. |
| <b>Prerequisites (if any)</b>              | Signals & Systems,<br>DSP | <b>Course Type</b> | Lab            |

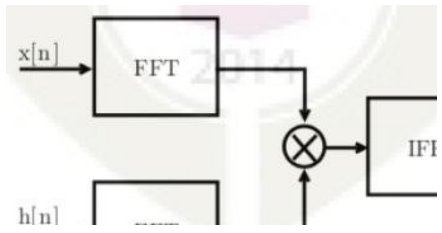

#### Course Objectives:

1. To realize the DFT, filtering techniques and familiarize DSP hardware
2. To implement Digital Filter.

#### Details of Experiment

| <b>Expt.</b> | <b>Experiment</b>   |
|--------------|---|
| <b>1</b>     | <b>Simulation of Signals</b> Simulate the following signals using Python/<br>Scilab/MATLAB.<br>1. Unit impulse signal 2. Unit pulse signal 3. Unit ramp signal 4. Bipolar pulse 5. Triangular signal  |
| <b>2</b>     | <b>Verification of the Properties of DFT</b><br>1. Generate a DFT matrix and apply it to an example sequence.<br>2. Write a function that returns the N point DFT matrix $V_N$ for a given N.<br>3. Plot its real and imaginary parts of $V_N$ as images using <code>matshow</code> or <code>imshow</code> commands (in Python) for $N = 16$ , $N = 64$ and $N = 1024$<br>4. Compute the DFTs of 16 point, 64 point and 1024 point random sequences using the above matrices.<br>5. Observe the time of computations for $N = 2^\sigma$ for different values of $\sigma$ . (You may use the <code>time</code> module in Python).<br>6. Use some iterations to plot the times of computation against $x$ . Plot and understand this curve. Plot the computation times for the FFT function over this curve and observe the computational advantage of FFT.<br>Circular Convolution.<br>1. Write a python function <code>circon.py</code> that returns the circular convolution of an $N_1$ point |

|   |   |
|---|---|
|   | <p>sequence and an <math>N/2</math> point sequence given at the input. The easiest way is to convert a linear convolution into circular convolution with <math>N = \max(N1, N2)</math>.</p> <p>Parseval's Theorem</p> <p>Take two complex random sequences <math>x1[n]</math> and <math>x2[n]</math>, and verify Parseval's Theorem.</p>  |
| 3 | <p><b>Familiarization of DSP Hardware</b></p> <ol style="list-style-type: none"> <li>1. Familiarization of the code composer studio (in the case of TI hard- ware) or Visual DSP (in the case of Analog Devices hardware) or any equivalent cross-compiler for DSP programming.</li> <li>2. Familiarization of the analog and digital input and output ports of the DSP board.</li> <li>3. Generation and cross compilation and execution of the C code to connect the input digital switches to the output LEDs.</li> <li>4. Generation and cross compilation and execution of the C code to connect the input analog port to the output. Connect a microphone, speak into it and observe the output electrical signal on a DSO and store it.</li> </ol> |
| 4 | <p><b>Linear convolution</b></p> <ol style="list-style-type: none"> <li>1. Write a C function for the linear convolution of two arrays.</li> <li>2. The arrays may be kept in different files and downloaded to the DSP hardware.</li> <li>3. Store the result as a file and observe the output.</li> </ol>   |
| 5 | <p><b>FFT of signals</b></p> <ol style="list-style-type: none"> <li>1. Write a C function for N - point FFT.</li> <li>2. Connect a precision signal generator and apply 1 mV, 1 kHz sinusoid at the analog port.</li> <li>3. Apply the FFT on the input signal with appropriate window size and observe the result.</li> <li>4. Connect microphone to the analog port and read in real time speech.</li> <li>5. Observe and store the FFT values.</li> </ol>  |
| 6 | <p><b>IFFT with FFT</b></p> <ol style="list-style-type: none"> <li>1. Use the FFT function in the previous experiment to compute the IFFT of the input signal.</li> <li>2. Apply IFFT on the stored FFT values from the previous experiments and observe the reconstruction.</li> </ol>   |
| 7 | <p><b>FIR low pass filter</b></p> <ol style="list-style-type: none"> <li>1. Use Python/scilab to implement the FIR filter response <math>h[n] = \omega^c n) / \pi</math> for a filter size <math>N = 50</math>, <math>\omega_c = 0.1\pi</math> and <math>\omega_c = 0.3\pi</math>.</li> <li>2. Realize the hamming (<math>wH [n]</math>) and kaiser (<math>wK[n]</math>) windows.</li> <li>3. Compute <math>h[n]w[n]</math> in both cases and store as file.</li> <li>4. Observe the low pass response in the simulator.</li> <li>5. Download the filter on to the DSP target board and test with 1 mV sinusoid from a signal generator connected to the analog port.</li> </ol>  |

|   |  |
|---|--|
|   | 6. Test the operation of the filters with speech signals.  |
| 8 | <p><b>Overlap Save Block Convolution</b></p> <ol style="list-style-type: none"> <li>1. Use the file of filter coefficients from the previous experiment.</li> <li>2. Realize the system shown below for the input speech signal <math>x[n]</math>.</li> </ol>  <ol style="list-style-type: none"> <li>3. ### Course Assessment Method (CIE: 50 Marks, ESE 50 Marks)

#### Continuous Internal Evaluation Marks (CIE):

| Attendance | Preparation/Pre-Lab Work, experiments, Viva and Timely completion of Lab Reports / Record. (Continuous Assessment) | Internal Exam | Total |
|------------|--|---------------|-------|
| 5          | 25   | 20            | 50    |

## End Semester Examination Marks (ESE):

| Procedure/<br>Preparatory<br>work/Design/<br>Algorithm | Conduct of experiment/<br>Execution of work/<br>troubleshooting/ Programming | Result with<br>valid inference/<br>Quality of<br>Output | Viva<br>voce | Record | Total |
|--|--|---|--------------|--------|-------|
| 10   | 15   | 10  | 10           | 5      | 50    |

### Mandatory requirements for ESE:

- Submission of Record: Students shall be allowed for the end semester examination only upon submitting the duly certified record.
- Endorsement by External Examiner: The external examiner shall endorse the record.

## Course Outcomes (COs)

At the end of the course the student will be able to:

| Course Outcome |   | Bloom's<br>Knowledge<br>Level (KL) |
|----------------|---|------------------------------------|
| CO1            | Generate basic signal waveforms                           | K2                                 |
| CO2            | Verify the properties of DFT                              | K2                                 |
| CO3            | Familiarize with DSP hardware and interface with Computer | K2                                 |
| CO4            | Implement LTI systems                                     | K3                                 |
| CO5            | Design and Implement FIR low-pass filters                 | K3                                 |

*K1- Remember, K2- Understand, K3- Apply, K4- Analyse, K5- Evaluate, K6- Create*

## CO-PO Mapping Table

|     | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 |

### **Continuous Assessment (25 Marks)**

#### **1. Preparation and Pre-Lab Work (7 Marks)**

- Pre-Lab Assignments: Assessment of pre-lab assignments or quizzes that test understanding of the upcoming experiment.
- Understanding of Theory: Evaluation based on students' preparation and understanding of the theoretical background related to the experiments.

## **2. Conduct of Experiments (7 Marks)**

- Procedure and Execution: Adherence to correct procedures, accurate execution of experiments, and following safety protocols.
- Skill Proficiency: Proficiency in handling equipment, accuracy in observations, and troubleshooting skills during the experiments.
- Teamwork: Collaboration and participation in group experiments.

## **3. Lab Reports and Record Keeping (6 Marks)**

- Quality of Reports: Clarity, completeness and accuracy of lab reports. Proper documentation of experiments, data analysis and conclusions.
- Timely Submission: Adhering to deadlines for submitting lab reports/rough record and maintaining a well-organized fair record.

## **4. Viva Voce (5 Marks)**

- Oral Examination: Ability to explain the experiment, results and underlying principles during a viva voce session.

*Final Marks Averaging: The final marks for preparation, conduct of experiments, viva, and record are the average of all the specified experiments in the syllabus.*

## **Evaluation Pattern for End Semester Examination (50 Marks)**

### **1. Procedure/Preliminary Work/Design/Algorithm (10 Marks)**

- Procedure Understanding and Description: Clarity in explaining the procedure and understanding each step involved.
- Preliminary Work and Planning: Thoroughness in planning and organizing materials/equipment.
- Algorithm Development: Correctness and efficiency of the algorithm related to the experiment.
- Creativity and logic in algorithm or experimental design.

### **2. Conduct of Experiment/Execution of Work/Programming (15 Marks)**

- Setup and Execution: Proper setup and accurate execution of the experiment or programming task.

**3. Result with Valid Inference/Quality of Output (10 Marks)**

- Accuracy of Results: Precision and correctness of the obtained results.
- Analysis and Interpretation: Validity of inferences drawn from the experiment or quality of program output.

**4. Viva Voce (10 Marks)**

- Ability to explain the experiment, procedure results and answer related questions
- Proficiency in answering questions related to theoretical and practical aspects of the subject.

**5. Record (5 Marks)**

- Completeness, clarity, and accuracy of the lab record submitted

## SEMESTER S5

### COMMUNICATION LAB I

|  |   |                    |                |
|--|---|--------------------|----------------|
| <b>Course Code</b>                     | <b>PCECL508</b>   | <b>CIE Marks</b>   | 50             |
| <b>Teaching Hours/Week (L: T:P: R)</b> | 0:0:3:0   | <b>ESE Marks</b>   | 50             |
| <b>Credits</b>                         | 2   | <b>Exam Hours</b>  | 2 Hrs. 30 Min. |
| <b>Prerequisites (if any)</b>          | Analog circuits, Signals and systems, Digital Signal Processing | <b>Course Type</b> | Lab            |

#### Course Objectives:

1. Understanding and Implementing Modulation and Detection Techniques
2. Analyzing and Evaluating Communication System Performance.

#### Details of Experiment

| <b>Expt. No</b> | <b>Experiment</b>   |
|-----------------|---|
|                 | <b>PART A: Hardware Experiments</b>   |
| <b>1</b>        | <b>Any one from the following Analog modulation schemes</b> <ul style="list-style-type: none"><li>● AM modulation and detection using Transistors or ICS</li><li>● FM modulation and detection</li></ul>  |
| <b>2</b>        | <b>Hardware Experiment: Any one from the following Digital modulation &amp; Waveform coding Schemes</b> <ul style="list-style-type: none"><li>● Generation and Detection of PCM signals</li><li>● Generation and Detection of Delta modulated signals</li><li>● Generation and Detection of BPSK</li><li>● Generation and Detection of QPSK</li></ul> |
|                 | <b>PART B: Simulation Experiments</b>   |
| <b>1.</b>       | Performance of Waveform Coding Using PCM  |

|                                       |   |
|---------------------------------------|---|
| 2.                                    | Pulse Shaping and Matched Filtering   |
| 3.                                    | Eye diagram   |
| 4.                                    | Error Performance of BPSK   |
| 5.                                    | Error Performance of QPSK   |
| <b>PART C: Software Defined Radio</b> |   |
| 1.                                    | Familiarization with Software Defined Radio (Hardware and Control Software) |
| 2.                                    | FM reception or FM transmission using SDR                                   |

### **Experiment Details**

#### **PART A: Hardware Experiments**

The students shall design and setup simple prototype circuits with the help of available ICs. They can observe waveforms produced by these circuits for standard ideal inputs

#### **PART B: Simulation Experiments**

The students shall write scripts to simulate components of communication systems for the following experiments.

#### **Performance of Waveform Coding Using PCM**

1. Generate a sinusoidal waveform with a DC offset so that it takes only
2. positive amplitude value.
3. Sample and quantize the signal using a uniform quantizer with number of
4. representation levels  $L$ . Vary  $L$ . Represent each value using decimal to
5. binary encoder.
6. Compute the signal-to-noise ratio in dB.
7. Plot the SNR versus number of bits per symbol. Observe that the SNR
8. increases linearly

#### **Pulse Shaping and Matched Filtering**

1. Generate a string of message bits.
2. Use Root Raised Cosine (RRC) pulse  $p(t)$  as the shaping pulse, and generate the

3. corresponding baseband signal with a fixed bit duration  $T_b$ . You may use roll-off factor as  $\alpha = 0.4$ . Vary the roll off rate and study.
4. Simulate transmission of baseband signal via an AWGN channel
5. Apply matched filter with frequency response  $Pr(f) = P^*(f)$  to the received signal.
6. Sample the signal at  $mT_b$  and compare it against the message sequence.

### **Eye diagram**

1. Generate a string of message bits.
2. Use raised cosine pulse  $p(t)$  as the shaping pulse, and generate the corresponding baseband signal with a fixed bit duration  $T_b$ . You may use roll-off factor as  $\alpha = 0.4$
3. Use various roll off factors and plot the eye diagram in each case for the received signal. Make a comparison study among them.

### **Error Performance of BPSK**

1. Generate a string of message bits.
2. Encode using BPSK with energy per bit  $E_b$  and represent it using points in a signal-space.
3. Simulate transmission of the BPSK modulated signal via an AWGN channel with variance  $N_0/2$ .
4. Detect using an ML decoder and plot the probability of error as a function of SNR per bit  $E_b/N_0$ .

### **Error Performance of QPSK**

1. Generate a string of message bits.
2. Encode using QPSK with energy per symbol  $E_b$  and represent it using points in a signal-space.
3. Simulate transmission of the QPSK modulated signal via an AWGN channel with variance  $N_0/2$  in both I-channel and Q-channel.
4. Detect using an ML decoder and plot the probability of error as a function of SNR per bit  $E_b/N_0$  where  $E_s = 2E_b$

## **PART C: Software Defined Radio**

The students shall emulate communication systems with the help of software-defined-radio hardware and necessary control software. Use available blocks in GNU Radio (or similar software's like Simulink/ Lab- View) to implement all the signal processing.

### **Familiarization with Software Defined Radio (Hardware and Control Software)**

1. Familiarize with an SDR hardware for reception and transmission of RF signal
2. Familiarize how it can be interfaced with computer
3. Familiarize with GNU Radio (or similar software's like Simulink/ Lab- View) that can be used to process the signals received through the SDR hardware.
4. Familiarize available blocks in GNU radio. Study how signals can be generated and spectrum (or power spectral density) of signals can be analyzed. Study how filtering can be performed.

### **FM reception using SDR**

1. Receive digitized FM signal (for the clearest channel in the lab) using the SDR board.
2. Set up an LPF and FM receiver using GNU Radio.
3. Use appropriate sink in GNU Radio to display the spectrum of signal.
4. Resample the voice to make it suitable for playing on computer speaker. or playing on compute

### **FM transmission using SDR**

1. Use a wave file source.
2. Set up an FM transmitter using GNU Radio.
3. Resample the voice source and transmit using the SDR.

### **Course Assessment Method (CIE: 50 Marks, ESE 50 Marks)**

#### **Continuous Internal Evaluation Marks (CIE):**

| <b>Attendance</b> | <b>Preparation/Pre-Lab Work, experiments, Viva and Timely completion of Lab Reports / Record. (Continuous Assessment)</b> | <b>Internal Exam</b> | <b>Total</b> |
|-------------------|---|----------------------|--------------|
| <b>5</b>          | <b>25</b>   | <b>20</b>            | <b>50</b>    |

### End Semester Examination Marks (ESE):

| Procedure/<br>Preparatory<br>work/Design/<br>Algorithm | Conduct of experiment/<br>Execution of work/<br>troubleshooting/ Programming | Result with<br>valid inference/<br>Quality of<br>Output | Viva<br>voce | Record | Total |
|--|--|---|--------------|--------|-------|
| 10   | 15   | 10  | 10           | 5      | 50    |

### Mandatory requirements for ESE:

- Submission of Record: Students shall be allowed for the end semester examination only upon submitting the duly certified record.
- Endorsement by External Examiner: The external examiner shall endorse the record.

### Course Outcomes (COs)

At the end of the course the student will be able to:

| Course Outcome |  | Bloom's<br>Knowledge<br>Level (KL) |
|----------------|--|------------------------------------|
| CO1            | Setup simple prototype circuits for waveform coding and digital modulation techniques working in a team.             | K3                                 |
| CO2            | Simulate the error performance of a digital communication system using standard binary and M-ary modulation schemes. | K4                                 |
| CO3            | Develop hands-on skills to emulate a communication system with software-designed-radio working in a team.            | K5                                 |

*K1- Remember, K2- Understand, K3- Apply, K4- Analyse, K5- Evaluate, K6- Create*

**CO-PO Mapping Table**

##### **3. Result with Valid Inference/Quality of Output (10 Marks)**

- Accuracy of Results: Precision and correctness of the obtained results.
- Analysis and Interpretation: Validity of inferences drawn from the experiment or quality of program output.

##### **4. Viva Voce (10 Marks)**

- Ability to explain the experiment, procedure results and answer related questions
- Proficiency in answering questions related to theoretical and practical aspects of the subject.

##### **5. Record (5 Marks)**

- Completeness, clarity, and accuracy of the lab record submitted

**ELECTRONICS & COMMUNICATION  
ENGINEERING**

## SEMESTER S6

### ADVANCED COMMUNICATION THEORY

|  |                    |                    |                |
|--|--------------------|--------------------|----------------|
| <b>Course Code</b>                         | <b>PCECT 601</b>   | <b>CIE Marks</b>   | 40             |
| <b>Teaching Hours/Week<br/>(L: T:P: R)</b> | 3:1:0:0            | <b>ESE Marks</b>   | 60             |
| <b>Credits</b>                             | 4                  | <b>Exam Hours</b>  | 2 Hrs. 30 Min. |
| <b>Prerequisites (if any)</b>              | ADC<br>(PCECT 502) | <b>Course Type</b> | Theory         |

#### Course Objectives:

1. To impart basics of information theory introducing both source coding and channel coding.
2. To impart the basic concepts of wireless communication system.

#### SYLLABUS

| <b>Module No.</b> | <b>Syllabus Description</b>  | <b>Contact Hours</b> |
|-------------------|--|----------------------|
| <b>1</b>          | Entropy: Entropy, Properties of Entropy, Joint and Conditional Entropy, Mutual Information, Properties of Mutual Information<br>Discrete memoryless sources, Source code, Average length of source code, Bounds on average length, uniquely decodable and prefix-free source codes. Kraft Inequality (with proof)<br>Shannon's source coding theorem (both achievability and converse), Huffman code, operational meaning of entropy.<br>Channel capacity, Capacity of discrete memoryless channels, Binary symmetric channels (BSC), Binary Erasure channels (BEC). Capacity of BSC and BEC, Shannon's channel coding theorem | <b>11</b>            |
| <b>2</b>          | Channel Capacity of AWGN Channel: Differential entropy, Differential Entropy of Gaussian random variable, Shannon-Hartley theorem (with proof), Shannon limit<br>Block codes: Error detecting and correcting capability. Linear block codes. Generator and parity-check matrix. (Systematic form only). Encoding circuit, Maximum likelihood decoding of linear block codes.   | <b>11</b>            |

|          |   |           |
|----------|---|-----------|
|          | <p>Bounded distance decoding. Syndrome, Standard array decoding.</p> <p>Convolutional Codes. State diagram. Trellis diagram. Maximum likelihood decoding. Viterbi algorithm.</p>  |           |
| <b>3</b> | <p>Introduction to Wireless Communication: - Introduction, Evolution, Paging. Wireless LAN, Bluetooth, Zig-Bee and Personal Area networks. Broadband Wireless Access-WiMax Technology. Wireless Spectrum allocation, Standards.</p> <p>Cellular System Design Fundamentals: Frequency Reuse, channel assignment strategies, Handoff strategies, Interference and system capacity, trunking and grade off service, improving coverage and capacity – cell splitting, sectoring, microcells</p> <p>Introduction to Multiple Access techniques: FDMA, TDMA, Code-Division Multiple Access (CDMA), Orthogonal Frequency-Division Multiple Access (OFDMA)</p>  | <b>11</b> |
| <b>4</b> | <p>Path loss and shadowing: Free space path loss, Two-Ray model, Shadowing</p> <p>Statistical Multipath Channel Models: Time-varying channel impulse response (Analysis not required) , Narrowband fading, Wideband fading models, Delay spread and Coherence bandwidth, Doppler spread and Coherence time, Flat fading versus frequency selective fading, Slow fading versus fast fading</p> <p>Multi-carrier Modulation: Data transmission using multicarrier modulation for frequency-selective fading channels, overlapping subchannels, Mitigation of Subcarrier Fading, Discrete Implementation of multicarrier – OFDM</p> <p>Diversity: Receiver diversity – selection combining and maximal ratio combining. Transmitter diversity – Alamouti scheme for 2x2 MIMO.</p> <p>Equalization: Equalization – Linear and non-linear equalization, MMSE equalizers.</p> | <b>11</b> |

**Course Assessment Method**  
**(CIE: 40 marks, ESE: 60 marks)**

**Continuous Internal Evaluation Marks (CIE):**

| <b>Attendance</b> | <b>Assignment/<br/>Microproject</b> | <b>Internal<br/>Examination-1<br/>(Written)</b> | <b>Internal<br/>Examination- 2<br/>(Written )</b> | <b>Total</b> |
|-------------------|-------------------------------------|---|---|--------------|
| <b>5</b>          | <b>15</b>                           | <b>10</b>                                       | <b>10</b>   | <b>40</b>    |

**End Semester Examination Marks (ESE)**

*In Part A, all questions need to be answered and in Part B, each student can choose any one full question out of two questions*

| <b>Part A</b>  | <b>Part B</b>  | <b>Total</b> |
|--|--|--------------|
| <ul style="list-style-type: none"> <li>● 2 Questions from each module.</li> <li>● Total of 8 Questions, each carrying 3 marks</li> </ul> <p style="text-align: center;"><b>(8x3 =24 marks)</b></p> | <ul style="list-style-type: none"> <li>● Each question carries 9 marks.</li> <li>● Two questions will be given from each module, out of which 1 question should be answered.</li> <li>● Each question can have a maximum of 3 sub divisions.</li> </ul> <p style="text-align: center;"><b>(4x9 = 36 marks)</b></p> | <b>60</b>    |

### Course Outcomes (COs)

At the end of the course students should be able to:

| Course Outcome |  | Bloom's Knowledge Level (KL) |
|----------------|--|------------------------------|
| <b>CO1</b>     | Explain information theory measures such as entropy, conditional entropy, mutual information                               | <b>K2</b>                    |
| <b>CO2</b>     | Apply source coding theorem for data compression.  | <b>K3</b>                    |
| <b>CO3</b>     | Apply channel coding for error detection and correction  | <b>K3</b>                    |
| <b>CO4</b>     | Explain the basic Principle of wireless communication techniques   | <b>K2</b>                    |
| <b>CO5</b>     | Describe the wireless channel models and analyse the performance of the modulation techniques for flat fading channels     | <b>K2</b>                    |
| <b>CO6</b>     | Identify the advantages of various diversity and equalization techniques for improving the wireless receiver performance . | <b>K3</b>                    |

Note: K1- Remember, K2- Understand, K3- Apply, K4- Analyse, K5- Evaluate, K6- Create

### CO-PO Mapping Table (Mapping of Course Outcomes to Program Outcomes)

|            | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 |

## SEMESTER S6

### MICROWAVES & ANTENNAS

|  |                                |                    |                |
|--|--------------------------------|--------------------|----------------|
| <b>Course Code</b>                         | <b>PCECT602</b>                | <b>CIE Marks</b>   | 40             |
| <b>Teaching Hours/Week<br/>(L: T:P: R)</b> | 3:0:0:0                        | <b>ESE Marks</b>   | 60             |
| <b>Credits</b>                             | 3                              | <b>Exam Hours</b>  | 2 Hrs. 30 Min. |
| <b>Prerequisites (if any)</b>              | Electromagnetics<br>(PCECT501) | <b>Course Type</b> | Theory         |

#### Course Objectives:

1. To gain knowledge on the basic parameters, types and design of antennas
2. To gain an insight into the principles of operations of microwave sources, hybrid circuits and semiconductor devices.

#### SYLLABUS

| <b>Module No.</b> | <b>Syllabus Description</b>  | <b>Contact Hours</b> |
|-------------------|--|----------------------|
| <b>1</b>          | <p><b>Microwaves:</b> Electromagnetic spectrum, Frequency Bands, Features of microwaves, advantages &amp; disadvantages, Applications, Atmospheric propagation effects.</p> <p><b>Cavity Resonator:</b> TE and TM modes in waveguides (Review only)- Rectangular Cavity Resonator- Resonance frequency, Q factor, Excitation and Tuning, Re-entrant cavity.</p> <p><b>Microwave Hybrid Circuits:</b> E plane Tee, H plane Tee, Hybrid Tee, Hybrid Ring, Two-hole directional coupler, Isolator, Circulator, Phase shifter, Attenuator</p> <p><b>Scattering parameters:</b> Properties of S matrix, S matrix formulation of E plane Tee, H plane Tee, Magic Tee, Directional coupler.</p> <p><b>Microwave Semiconductor Devices:</b> Principle of operation of Tunnel diode, Gunn diode- Different modes.</p> | <b>9</b>             |
| <b>2</b>          | <p><b>Microwave tubes:</b> Types, Structure and Principles of operation of Two Cavity Klystron- Velocity Modulation, Bunching</p>  | <b>9</b>             |

|   |   |   |
|---|---|---|
|   | <p>Reflex Klystron- Velocity Modulation, Power output and efficiency</p> <p>Traveling Wave Tube Amplifier- Slow wave structures, Helix TWT amplification process.</p> <p>Magnetron Oscillator- Cylindrical magnetron, Cyclotron angular frequency,</p> <p><b>Microwave measurements:</b> Measurement of Power, VSWR, frequency, wavelength, insertion loss, impedance and attenuation; Basic concept of Network Analyzer and Anechoic chamber</p>   |   |
| 3 | <p><b>Antennas:</b> Definition, Radiation mechanism, Polarisation, Types, Applications</p> <p><b>Basic antenna parameters:</b> Radiation Pattern, Radiation Power Density, Radiation Intensity, Radiation resistance, Beamwidth, Directivity, Antenna Efficiency, Gain, Beam Efficiency, Bandwidth, Input Impedance, Antenna Radiation Efficiency, Effective aperture area, Effective height, Antenna noise temperature</p> <p>Reciprocity theorem, Helmholtz theorem, Duality Theorem (No proof required)</p> <p>Field, directivity and radiation resistance of a short dipole and half wave dipole (far field derivation).</p>  | 9 |
| 4 | <p><b>Antenna arrays:</b> Field of two isotropic point sources, Principle of pattern multiplication, Array factor, Linear arrays of 'n' isotropic point sources with equal amplitude, Grating lobes, Design of Broadside and End fire arrays, Phased array principle, Adaptive antenna array principle.</p> <p><b>Broad band antennas:</b> Log periodic antenna array – Principle and design equations</p> <p>Helical antenna: Design equations, modes</p> <p>Micro strip Rectangular Patch Antennas -Design equations, important feeding methods.</p> <p>Horn antenna- Types, principles, expressions for E, H and gain (no derivation required)</p> <p>Parabolic dish antenna –Principle, Cassegrain feed, expression for E, H and Gain without derivation,</p> <p>Mobile phone antenna – Inverted F antenna.</p> | 9 |

**Course Assessment Method**  
(CIE: 40 marks, ESE: 60 marks)

**Continuous Internal Evaluation Marks (CIE):**

| Attendance | Assignment/<br>Microproject | Internal<br>Examination-1<br>(Written) | Internal<br>Examination- 2<br>(Written ) | Total |
|------------|-----------------------------|--|--|-------|
| 5          | 15                          | 10                                     | 10                                       | 40    |

**End Semester Examination Marks (ESE)**

*In Part A, all questions need to be answered and in Part B, each student can choose any one full question out of two questions*

| Part A   | Part B   | Total     |
|--|--|-----------|
| <ul style="list-style-type: none"> <li>• 2 Questions from each module.</li> <li>• Total of 8 Questions, each carrying 3 marks</li> </ul> <p style="text-align: center;"><b>(8x3 =24 marks)</b></p> | <ul style="list-style-type: none"> <li>• Each question carries 9 marks.</li> <li>• Two questions will be given from each module, out of which 1 question should be answered.</li> <li>• Each question can have a maximum of 3 sub divisions.</li> </ul> <p style="text-align: center;"><b>(4x9 = 36 marks)</b></p> | <b>60</b> |

**Course Outcomes (COs)**

At the end of the course students should be able to:

| Course Outcome |  | Bloom's<br>Knowledge<br>Level (KL) |
|----------------|--|------------------------------------|
| <b>CO1</b>     | Explain the basic mechanism of operation of cavity resonator and microwave sources                     | <b>K2</b>                          |
| <b>CO2</b>     | Apply the S parameter theory to obtain the S matrices of various microwave hybrid circuits             | <b>K3</b>                          |
| <b>CO3</b>     | Illustrate the basic concepts of antenna radiation antenna parameters and their measurement techniques | <b>K2</b>                          |
| <b>CO4</b>     | Design important broadband antennas and arrays   | <b>K3</b>                          |

Note: K1- Remember, K2- Understand, K3- Apply, K4- Analyse, K5- Evaluate, K6- Create

### CO-PO Mapping Table (Mapping of Course Outcomes to Program Outcomes)

## SEMESTER S6

### COMPUTER NETWORKS

|  |                        |                    |                |
|--|------------------------|--------------------|----------------|
| <b>Course Code</b>                         | <b>PEECT 631</b>       | <b>CIE Marks</b>   | 40             |
| <b>Teaching Hours/Week<br/>(L: T:P: R)</b> | 3:0:0:0                | <b>ESE Marks</b>   | 60             |
| <b>Credits</b>                             | 3                      | <b>Exam Hours</b>  | 2 Hrs. 30 Min. |
| <b>Prerequisites (if any)</b>              | None/<br>(Course code) | <b>Course Type</b> | Theory         |

#### Course Objectives:

1. The course aims to expose students to computer networks taking a top-down approach of viewing from the layer of user applications and zooming into link layer protocols. The principles of various protocols used in every layer are studied in detail.

#### SYLLABUS

| <b>Module No.</b> | <b>Syllabus Description</b>  | <b>Contact Hours</b> |
|-------------------|--|----------------------|
| <b>1</b>          | <b>Introduction to Computer Networks</b> Components of computer networks. Transmission modes in computer communication.<br><br>Switching: circuit switching and packet switching. Performance analysis of packet switched network: Throughput analysis, Delay and loss in packet-switched networks, Types of delay, Packet loss.<br><br>Introduction to Queueing models in computer networks. Little's theorem.<br><br>Networks: Network criteria, physical structures, network models, categories of networks, Interconnection of Networks.<br><br>Layered Architecture: Protocol layering, Internet protocol stack. TCP/IP protocol suite. | <b>9</b>             |
| <b>2</b>          | <b>Application Layer:</b> Communication between processes, Web application: HTTP, Message format, Email application: SMTP, Message format, MIME, POP3, Domain Name System (DNS).   | <b>9</b>             |

|   |   |    |
|---|---|----|
|   | <p><b>Transport Layer</b> connectionless and connection-oriented protocols. UDP-Protocols for reliable data transfer: ARQ protocols, stop-and-wait protocol, alternating-bit protocol, Go-back- N, Selective Repeat. TCP Connection, segment structure, RTT estimate, Flow control.</p> <p><b>Congestion Control</b> General approaches. TCP congestion control. Congestion control mechanisms and Quality of service.</p>  |    |
| 3 | <p><b>Network Layer:</b> Datagram versus virtual-circuit network service, Router architecture, Routing and Forwarding, Static routing and Dynamic routing.</p> <p>Address Resolution protocols (ARP, RARP)</p> <p>Subnetting, Classless Routing(CIDR), ICMP.</p> <p><b>IPv4:</b> Datagram format, Fragmentation and reassembly, addressing, address assignment – manual and DHCP. IPv6- Datagram format, Transitioning from IPv4 to IPv6, IP security.</p> <p><b>Routing Algorithms</b> Link-State (Dijkstra’s) Algorithm, Distance vector algorithm. Routing in Internet – RIP, OSPF, BGP.</p> | 10 |
| 4 | <p><b>Link Layer</b> Services of link layer, Error detection and correction – checksum, CRC.</p> <p>Multiple access protocols – Channel partitioning, random access. ALOHA – pure and slotted, efficiency, CSMA, CSMA/CA, CSMA/CD. Link layer addressing: MAC address, Ethernet. Wireless Networks IEEE 802.11 wireless LAN.</p> <p><b>Physical Layer:</b> Guided and unguided transmission media<br/>(Co-axial cable, UTP, STP, Fiber optic cable)</p>   | 8  |

**Course Assessment Method**  
(CIE: 40 marks, ESE: 60 marks)

**Continuous Internal Evaluation Marks (CIE):**

| Attendance | Assignment/<br>Microproject | Internal<br>Examination-1<br>(Written) | Internal<br>Examination- 2<br>(Written ) | Total |
|------------|-----------------------------|--|--|-------|
| 5          | 15                          | 10                                     | 10                                       | 40    |

**End Semester Examination Marks (ESE)**

*In Part A, all questions need to be answered and in Part B, each student can choose any one full question out of two questions*

| Part A  | Part B   | Total     |
|---|--|-----------|
| <ul style="list-style-type: none"> <li>• 2 Questions from each module.</li> <li>• Total of 8 Questions, each carrying 3 marks</li> </ul> <p style="text-align: center;"><b>(8x3 =24marks)</b></p> | <ul style="list-style-type: none"> <li>• Each question carries 9 marks.</li> <li>• Two questions will be given from each module, out of which 1 question should be answered.</li> <li>• Each question can have a maximum of 3 sub divisions.</li> </ul> <p style="text-align: center;"><b>(4x9 = 36 marks)</b></p> | <b>60</b> |

**Course Outcomes (COs)**

At the end of the course students should be able to:

| Course Outcome |   | Bloom's<br>Knowledge<br>Level (KL) |
|----------------|---|------------------------------------|
| <b>CO1</b>     | Summarize the principles and components of computer networks, switching, basic concepts of delay analysis and the layered network architecture. | <b>K2</b>                          |
| <b>CO2</b>     | Demonstrate protocols and the functions of different layers.  | <b>K2</b>                          |
| <b>CO3</b>     | Analyse the concept of routing and addressing protocols in the context of computer networking.  | <b>K3</b>                          |
| <b>CO4</b>     | Make use of different physical communication standards in computer networks.  | <b>K3</b>                          |

Note: K1- Remember, K2- Understand, K3- Apply, K4- Analyse, K5- Evaluate, K6- Create

### CO-PO Mapping Table (Mapping of Course Outcomes to Program Outcomes)

|            | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 |
|------------|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|
| <b>CO1</b> | 3   |     |     |     |     | -   | -   | -   | -   | -    | -    | 2    |
| <b>CO2</b> | 3   |     |     |     |     | -   | -   | -   | -   | -    | -    | 2    |
| <b>CO3</b> | 3   | 2   | 2   | 2   | 2   | -   | -   | -   | -   | -    |      | 3    |
| <b>CO4</b> | 3   | 2   | 2   | 2   | 2   | -   | -   | -   | -   | -    | -    | 3    |

Note: 1: Slight (Low), 2: Moderate (Medium), 3: Substantial (High), -: No Correlation

| <b>Text Books</b> |   |                                 |                       |                          |

## SEMESTER S6

### DIGITAL IMAGE PROCESSING

|  |                        |                    |                |
|--|------------------------|--------------------|----------------|
| <b>Course Code</b>                         | <b>PEECT 632</b>       | <b>CIE Marks</b>   | 40             |
| <b>Teaching Hours/Week<br/>(L: T:P: R)</b> | 3:0:0:0                | <b>ESE Marks</b>   | 60             |
| <b>Credits</b>                             | 3                      | <b>Exam Hours</b>  | 2 Hrs. 30 Min. |
| <b>Prerequisites (if any)</b>              | None/<br>(Course code) | <b>Course Type</b> | Theory         |

#### Course Objectives:

1. To introduce the fundamental concepts of Digital Image Processing and study the various transforms required for image processing.
2. To study spatial and frequency domain image enhancement and image restoration methods.
3. To understand image compression and segmentation techniques.,

#### SYLLABUS

| <b>Module No.</b> | <b>Syllabus Description</b>   | <b>Contact Hours</b> |
|-------------------|---|----------------------|
| <b>1</b>          | Digital Image Fundamentals: Image representation, Types of images, Elements of DIP system, Basic relationship between pixels, Distance Measures, Simple image formation model. Brightness, contrast, hue, saturation, Mach band effect. Colour image fundamentals-RGB, CMY, HIS models, 2D sampling and quantization. | <b>9</b>             |
| <b>2</b>          | 2D Image transforms: DFT, Properties, Walsh transform, Hadamard transform, Haar transform, DCT, KL transform and Singular Value Decomposition.<br>Image Compression: Image compression model, Lossy, lossless compression, Concept of transform coding, JPEG Image compression standard.                              | <b>9</b>             |
| <b>3</b>          | Image Enhancement: Spatial domain methods: Basic Gray Level Transformations, Histogram Processing, Enhancement Using Arithmetic/Logic Operations, Basics of Spatial Filtering, Smoothing spatial Filters, Sharpening spatial Filters.   | <b>9</b>             |

|          |  |          |
|----------|--|----------|
|          | Frequency domain methods: low pass filtering, high pass filtering, homomorphic filtering.  |          |
| <b>4</b> | Image Restoration: Degradation model, Inverse filtering- removal of blur caused by uniform linear motion, Minimum Mean Square Error (Wiener) Filtering.<br>Image segmentation: Region based approach, clustering , Segmentation based on thresholding, edge based segmentation, Hough Transform. | <b>9</b> |

**Course Assessment Method**  
**(CIE: 40 marks, ESE: 60 marks)**

**Continuous Internal Evaluation Marks (CIE):**

| <b>Attendance</b> | <b>Assignment/<br/>Microproject</b> | <b>Internal<br/>Examination-1<br/>(Written)</b> | <b>Internal<br/>Examination- 2<br/>(Written )</b> | <b>Total</b> |
|-------------------|-------------------------------------|---|---|--------------|
| <b>5</b>          | <b>15</b>                           | <b>10</b>                                       | <b>10</b>   | <b>40</b>    |

**End Semester Examination Marks (ESE)**

*In Part A, all questions need to be answered and in Part B, each student can choose any one full question out of two questions*

| <b>Part A</b>   | <b>Part B</b>  | <b>Total</b> |
|---|--|--------------|
| <ul style="list-style-type: none"> <li>• 2 Questions from each module.</li> <li>• Total of 8 Questions, each carrying 3 marks</li> </ul> <p style="text-align: center;"><b>(8x3 =24marks)</b></p> | <ul style="list-style-type: none"> <li>• Each question carries 9 marks.</li> <li>• Two questions will be given from each module, out of which 1 question should be answered.</li> <li>• Each question can have a maximum of 3 sub divisions.</li> </ul> <p style="text-align: center;"><b>(4x9 = 36 marks)</b></p> | <b>60</b>    |

## Course Outcomes (COs)

At the end of the course students should be able to:

| Course Outcome |   | Bloom's Knowledge Level (KL) |
|----------------|---|------------------------------|
| <b>CO1</b>     | Explain different components of image processing system                                 | <b>K2</b>                    |
| <b>CO2</b>     | Analyse the various concepts and mathematical transforms necessary for image processing | <b>K3</b>                    |
| <b>CO3</b>     | Illustrate the various schemes of image compression                                     | <b>K3</b>                    |
| <b>CO4</b>     | Analyze the filtering and restoration of images   | <b>K3</b>                    |
| <b>CO5</b>     | Describe the basic image segmentation techniques  | <b>K2</b>                    |

Note: K1- Remember, K2- Understand, K3- Apply, K4- Analyse, K5- Evaluate, K6- Create

### CO-PO Mapping Table (Mapping of Course Outcomes to Program Outcomes)

|            | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 |
|------------|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|
| <b>CO1</b> | 3   | 3   | 3   |     | 1   |     |     |     |     |      |      | 2    |
| <b>CO2</b> | 3   | 3   | 3   |     | 1   |     |     |     |     |      |      | 2    |
| <b>CO3</b> | 3   | 3   | 3   |     | 1   |     |     |     |     |      |      | 2    |
| <b>CO4</b> | 3   | 3   | 3   |     | 1   |     |     |     |     |      |      | 2    |

## SEMESTER S6

### SECURE COMMUNICATION

|  |                        |                    |               |
|--|------------------------|--------------------|---------------|
| <b>Course Code</b>                         | <b>PEECT 633</b>       | <b>CIE Marks</b>   | 40            |
| <b>Teaching Hours/Week<br/>(L: T:P: R)</b> | 3:0:0:0                | <b>ESE Marks</b>   | 60            |
| <b>Credits</b>                             | 3                      | <b>Exam Hours</b>  | 2 Hr. 30 Min. |
| <b>Prerequisites (if any)</b>              | None/<br>(Course code) | <b>Course Type</b> | Theory        |

#### Course Objectives:

1. Understand and discuss the fundamental concepts of encryption
2. Provide insight into different types of encryption standards
3. Understand basic concepts of Cryptography

#### SYLLABUS

| <b>Module No.</b> | <b>Syllabus Description</b>   | <b>Contact Hours</b> |
|-------------------|---|----------------------|
| <b>1</b>          | Introduction and Classic Encryption Techniques:-OSI security architecture, Security attacks – Passive attacks, Active attacks, Security services- Authentication, Access Control, Data Confidentiality, Data integrity, Nonrepudiation, Availability service. Model for network security. Symmetric cipher model, Cryptography, Substitution techniques- Hill Cipher, Transposition Techniques.<br><br>Finite Fields: -Groups, Rings and Fields, Modular arithmetic, Euclidian algorithm, Finite Fields of the form $GF(p)$ , Polynomial arithmetic | <b>9</b>             |
| <b>2</b>          | Block Ciphers: - Data Encryption Standard, Block Cipher Principles – Stream Ciphers and Block Ciphers, Feistel Cipher, Feistel Decryption algorithm, The Data encryption standard, DES Decryption, The AES Cipher, substitute bytes transformation, Shift row transformation, Mix Column transformation.  | <b>9</b>             |
| <b>3</b>          | Public Key Cryptography: -RSA and Key Management, Principles of public key cryptosystems-Public key cryptosystems, Application for Public key cryptosystem requirements, Fermat's theorem, Euler's Totient Function,  |                      |

|          |  |          |
|----------|--|----------|
|          | Euler's theorem, RSA algorithm, Key management, Distribution of public keys, Publicly available directory, Public key authority, public key certificates, Distribution of secret keys using public key cryptography. | <b>9</b> |
| <b>4</b> | Message Authentication and Hash Function: - Authentication requirements, Authentication functions- Message Encryption, Public Key Encryption, Message Authentication Code, Hash function                             | <b>9</b> |

**Course Assessment Method**  
(CIE: 40 marks, ESE: 60 marks)

**Continuous Internal Evaluation Marks (CIE):**

| <b>Attendance</b> | <b>Assignment/<br/>Microproject</b> | <b>Internal<br/>Examination-1<br/>(Written)</b> | <b>Internal<br/>Examination- 2<br/>(Written )</b> | <b>Total</b> |
|-------------------|-------------------------------------|---|---|--------------|
| <b>5</b>          | <b>15</b>                           | <b>10</b>                                       | <b>10</b>   | <b>40</b>    |

**End Semester Examination Marks (ESE)**

*In Part A, all questions need to be answered and in Part B, each student can choose any one full question out of two questions*

| <b>Part A</b>   | <b>Part B</b>  | <b>Total</b> |
|---|--|--------------|
| <ul style="list-style-type: none"> <li>• 2 Questions from each module.</li> <li>• Total of 8 Questions, each carrying 3 marks</li> </ul> <p style="text-align: center;"><b>(8x3 =24marks)</b></p> | <ul style="list-style-type: none"> <li>• Each question carries 9 marks.</li> <li>• Two questions will be given from each module, out of which 1 question should be answered.</li> <li>• Each question can have a maximum of 3 sub divisions.</li> </ul> <p style="text-align: center;"><b>(4x9 = 36 marks)</b></p> | <b>60</b>    |

## Course Outcomes (COs)

At the end of the course students should be able to:

| Course Outcome |   | Bloom's Knowledge Level (KL) |
|----------------|---|------------------------------|
| <b>CO1</b>     | Explain network security services and mechanisms and the types of attacks they are designed for and apply the concepts of modular arithmetic, Euclidean algorithm, polynomial arithmetic. | <b>K3</b>                    |
| <b>CO2</b>     | Illustrate the principles of modern symmetric ciphers like Data Encryption Standard and Advanced Encryption Standard.   | <b>K3</b>                    |
| <b>CO3</b>     | Outline the concepts of public key cryptography, RSA algorithm, key distribution, and management for public key systems.  | <b>K2</b>                    |
| <b>CO4</b>     | Explain the requirements for authentication and the types of functions used to produce an authenticator   | <b>K2</b>                    |

Note: K1- Remember, K2- Understand, K3- Apply, K4- Analyse, K5- Evaluate, K6- Create

### CO-PO Mapping Table (Mapping of Course Outcomes to Program Outcomes)

## SEMESTER S6

### NANOELECTRONICS

|  |                        |                    |                |
|--|------------------------|--------------------|----------------|
| <b>Course Code</b>                         | <b>PEECT634</b>        | <b>CIE Marks</b>   | 40             |
| <b>Teaching Hours/Week<br/>(L: T:P: R)</b> | 3:0:0:0                | <b>ESE Marks</b>   | 60             |
| <b>Credits</b>                             | 3                      | <b>Exam Hours</b>  | 2 Hrs. 30 Min. |
| <b>Prerequisites (if any)</b>              | None/<br>(Course code) | <b>Course Type</b> | Theory         |

#### Course Objectives:

1. To understand the challenges of scaling of devices to Nano-meter scales
2. To design novel transistor devices to reduce the short channel effects and to improve the performance
3. To understand the Nano-scale quantum transport in Nano electronic devices from atom to transistor
4. To apply quantum mechanics in materials and quantum devices

#### SYLLABUS

| <b>Module No.</b> | <b>Syllabus Description</b>   | <b>Contact Hours</b> |
|-------------------|---|----------------------|
| 1                 | <b>Introduction to Nano electronics-Review of MOSFETs-</b> Band diagram-operation-threshold voltage- current-MOSFET parameters.<br><b>Challenges going to sub-100 nm MOSFETs-</b> Technological and physical limits of Nano electronic systems, characteristic lengths<br><b>Scaling and short channel effects-</b> Channel length, Oxide layer thickness, tunneling, power density, non-uniform dopant concentration, threshold voltage scaling, hot electron effects, sub threshold current, velocity saturation, DIBL, channel length modulation.<br><b>High-K gate dielectrics-</b> Effective oxide thickness, Effects of high-K gate dielectrics on MOSFET performance<br>(Text books 1,2,3) | 9                    |
| 2                 | <b>Novel MOS Devices and Performance Optimization</b><br><b>Silicon-on-insulator devices--FD SOI, PD SOI</b>  |                      |

|          |   |          |
|----------|---|----------|
|          | <p><b>Multiple gate MOSFETs</b>--Double gate MOSFETs, FinFETs, Nanowires- Multi gate MOSFET physics-natural length and short channel effects.</p> <p><b>Multi Gate MOSFET performance optimization:</b> Fins, Fin Width, Fin Height and Fin Pitch, Fin Surface Crystal Orientation, Fins on Bulk Silicon, Nano-wires. Gate Stack, Gate Patterning, Threshold Voltage and Gate Work function requirements, Poly silicon Gate, Metal Gate, Tunable Work function metal gate, Mobility and Strain Engineering, Nitride Stress Liners, Embedded SiGe and SiC Source and Drain, Local Strain from Gate Electrode, Substrate Strain, Strained Silicon on Insulator.</p> <p>(Text books 1,4)</p>   | <b>9</b> |
| <b>3</b> | <p><b>Quantum Transport</b></p> <p><b>Atomistic view of electrical Resistance</b>-Energy level diagram- What makes electrons flow- The quantum of conductance - Potential profile- Coulomb blockade - Towards Ohm's law</p> <p><b>Schrodinger equation</b>- Method of finite differences – Examples (particle in a box only)</p> <p><b>Band structure</b>- 1-D examples- General result with basis- 2-D example</p> <p><b>Sub bands</b>- Quantum wells, wires, dots, graphene and “carbon nanotubes” -- Density of states-Minimum resistance of a wire</p> <p><b>Ballistic to Diffusive Transport</b>-Landauer formula, Landauer-Buttiker formula. Ballistic and Diffusive transport – transmission.</p> <p>(Text books 3,5,6. Use MATLAB codes in the text book “Quantum transport atom to transistor” to illustrate the concepts)</p> | <b>9</b> |
| <b>4</b> | <p><b>Applications of Quantum mechanics and Quantum devices</b></p> <p><b>Tunneling and applications of quantum mechanics</b>- solution of Schrodinger equation: Free space, Potential well, tunneling through a potential barrier. Potential energy profiles for material interfaces, Applications of tunneling.</p> <p><b>Hetero junctions</b> -Modulation-doped hetero junctions- SiGe strained hetero structures- MODFET- Resonant tunnelling-Resonant tunnelling transistor</p> <p><b>Single electron devices</b> –Coulomb blockade in a Nano capacitor, tunnel junctions, Double tunnel junction--Coulomb staircase, Single electron transistor.</p> <p><b>Spintronics</b>-Transport of spin, GMR-TMR,applications, Spin Transistor</p> <p>(Text books 3,6)</p>   | <b>9</b> |

**Course Assessment Method**  
(CIE: 40 marks, ESE: 60 marks)

**Continuous Internal Evaluation Marks (CIE):**

| Attendance | Assignment/<br>Microproject | Internal<br>Examination-1<br>(Written) | Internal<br>Examination- 2<br>(Written ) | Total |
|------------|-----------------------------|--|--|-------|
| 5          | 15                          | 10                                     | 10                                       | 40    |

**End Semester Examination Marks (ESE)**

*In Part A, all questions need to be answered and in Part B, each student can choose any one full question out of two questions*

| Part A  | Part B   | Total     |
|---|--|-----------|
| <ul style="list-style-type: none"> <li>• 2 Questions from each module.</li> <li>• Total of 8 Questions, each carrying 3 marks</li> </ul> <p style="text-align: center;"><b>(8x3 =24marks)</b></p> | <ul style="list-style-type: none"> <li>• Each question carries 9 marks.</li> <li>• Two questions will be given from each module, out of which 1 question should be answered.</li> <li>• Each question can have a maximum of 3 sub divisions.</li> </ul> <p style="text-align: center;"><b>(4x9 = 36 marks)</b></p> | <b>60</b> |

**Course Outcomes (COs)**

At the end of the course students should be able to:

| Course Outcome |   | Bloom's<br>Knowledge<br>Level (KL) |
|----------------|---|------------------------------------|
| CO1            | Describe the challenges of scaling of electron devices to Nano meter scales                 | <b>K2</b>                          |
| CO2            | Design novel transistor devices to reduce the short channel effects and improve performance | <b>K3</b>                          |
| CO3            | Outline the Nano scale quantum transport in Nano electronic devices from atom to transistor | <b>K2</b>                          |
| CO4            | Apply quantum mechanics in materials and quantum devices                                    | <b>K3</b>                          |

Note: K1- Remember, K2- Understand, K3- Apply, K4- Analyse, K5- Evaluate, K6- Create

### CO-PO Mapping Table (Mapping of Course Outcomes to Program Outcomes)

|-------------------|---|----------------------|
| <b>1</b>          | <p><b>Optical fiber Communications:</b> Structure of Optical fiber, materials, General block diagram of optical communication system, Advantages.</p> <p><b>Optical fiber waveguides:</b> Principle of light guidance, Numerical Aperture, V number, Step and Graded index fibers, Single and Multi mode fibers.</p> <p><b>Transmission Characteristics:</b> Attenuation, Absorption losses, Linear and Non linear scattering losses, bend losses. Dispersion- Intermodal dispersion, Chromatic dispersion, Dispersion modified fibers, Photonic crystal fibers, Polarization mode dispersion, Nonlinear effects, Solitons.</p> | <b>9</b>             |
| <b>2</b>          | <p><b>Optical fibers and Cables</b> – Fabrication Techniques- Double crucible method, Outside Vapour phase oxidation, Modified Chemical Vapour Deposition. Optical Fiber Cables- Single and Multi fiber cables.</p> <p><b>Optical Fiber Connections:</b> splices, connectors &amp; couplers.</p> <p><b>Optical Fiber Measurements:-</b> Attenuation and dispersion measurements, MZ interferometer, Optical Time Domain Reflectometer – Applications</p>  | <b>9</b>             |
| <b>3</b>          | <p><b>Optical sources:</b> LEDs and LDs, general structures, characteristics, modulators using LEDs and LDs. coupling with fibres,</p> <p><b>Optical detectors:</b> Quantum efficiency and Responsivity, Structure and</p>  | <b>9</b>             |

|   |  |   |
|---|--|---|
|   | <p>working of PIN and APD</p> <p><b>Optical Receivers:</b> - Direct detection- noise in detectors, SNR, BER analysis</p> <p>Coherent detection principles.</p> <p><b>Optical Amplifiers:</b> EDFA - Principle, structure and working, Raman amplifiers</p>   |   |
| 4 | <p><b>Multiplexing Strategies:</b> OTDM, SCM, OFDM, WDM and Optical CDMA: concepts, components - couplers, splitters, Add/ Drop multiplexers, Fiber grating filters, tunable filters.</p> <p><b>Optical networks</b> – General description of SONET/SDH</p> <p><b>Free space optics:</b> Principle of LiFi technology. Visible Light Communication</p> <p><b>Other applications of optical fibers:</b> Entertainment, Sensors – Types &amp; principles</p> | 9 |

**Course Assessment Method**  
(CIE: 40 marks, ESE: 60 marks)

**Continuous Internal Evaluation Marks (CIE):**

| Attendance | Assignment/<br>Microproject | Internal<br>Examination-1<br>(Written) | Internal<br>Examination- 2<br>(Written ) | Total |
|------------|-----------------------------|--|--|-------|
| 5          | 15                          | 10                                     | 10                                       | 40    |

## End Semester Examination Marks (ESE)

*In Part A, all questions need to be answered and in Part B, each student can choose any one full question out of two questions*

| <b>Part A</b>  | <b>Part B</b>  | <b>Total</b> |
|--|--|--------------|
| <ul style="list-style-type: none"><li>• 2 Questions from each module.</li><li>• Total of 8 Questions, each carrying 3 marks</li></ul> <p><b>(8x3 =24marks)</b></p> | <ul style="list-style-type: none"><li>• Each question carries 9 marks.</li><li>• Two questions will be given from each module, out of which 1 question should be answered.</li><li>• Each question can have a maximum of 3 sub divisions.</li></ul> <p><b>(4x9 = 36 marks)</b></p> | <b>60</b>    |

## Course Outcomes (COs)

At the end of the course students should be able to:

| <b>Course Outcome</b> |  | <b>Bloom's Knowledge Level (KL)</b> |
|-----------------------|--|-------------------------------------|
| <b>CO1</b>            | Explain the structure, fabrication, principle of operation and classifications of optical fibers         | <b>K2</b>                           |
| <b>CO2</b>            | Describe the transmission characteristics and evaluate losses in optical fiber                           | <b>K2</b>                           |
| <b>CO3</b>            | Illustrate the working of sources, detectors and optical amplifiers used in optical communication system | <b>K2</b>                           |
| <b>CO4</b>            | Explain the concepts of Multiplexing, Optical Networks and Free Space Communication                      | <b>K2</b>                           |

Note: K1- Remember, K2- Understand, K3- Apply, K4- Analyse, K5- Evaluate, K6- Create

**CO-PO Mapping Table (Mapping of Course Outcomes to Program Outcomes)**

|            | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 |

**SEMESTER S6**  
**OPTIMIZATION TECHNIQUES**

|  |                        |                    |                |
|--|------------------------|--------------------|----------------|
| <b>Course Code</b>                         | <b>PEECT637</b>        | <b>CIE Marks</b>   | 40             |
| <b>Teaching Hours/Week<br/>(L: T:P: R)</b> | 3:0:0:0                | <b>ESE Marks</b>   | 60             |
| <b>Credits</b>                             | 3                      | <b>Exam Hours</b>  | 2 Hrs. 30 Min. |
| <b>Prerequisites (if any)</b>              | None/<br>(Course code) | <b>Course Type</b> | Theory         |

**Course Objectives:**

1. Enable the learner to formulate engineering minima/maxima problems as optimization problems
2. Enable the learner to deploy various constrained and unconstrained optimization algorithms to obtain the minima/maxima of engineering problems

**SYLLABUS**

| <b>Module No.</b> | <b>Syllabus Description</b>  | <b>Contact Hours</b> |
|-------------------|--|----------------------|
| <b>1</b>          | Engineering application of Optimization – Statement of an Optimization problem–Classification, Review of basic calculus concepts –Stationary points; Functions of single and two variables; Convexity and concavity of functions –Definition of Global and Local optima – Optimality criteria, Linear programming methods for optimum design – Standard form of linear programming (LP) problem; Canonical form of LP problem; Simplex Method, Duality, Application of LPP models in engineering | <b>9</b>             |
| <b>2</b>          | Optimization algorithms for solving unconstrained nonlinear optimization problems – Search based techniques: Direct search: Fibonacci and golden section search , Hookes and Jeeves , Gradient based method: Newton’s method   | <b>9</b>             |
| <b>3</b>          | Optimization algorithms for solving constrained optimization problems– direct methods – penalty function methods, barrier method -Optimization of function of multiple variables subject to equality constraints; Lagrangian function– Inequality constrained techniques-KKT conditions-constrained  | <b>9</b>             |

|   |   |   |
|---|---|---|
|   | steepest descent method   |   |
| 4 | Modern methods of Optimization– Metaheuristic techniques: Genetic Algorithms – Simulated Annealing – Particle Swarm optimization –Ant colony optimization– : Use of Matlab/Scilab to solve optimization problem | 9 |

**Course Assessment Method**  
(CIE: 40 marks, ESE: 60 marks)

**Continuous Internal Evaluation Marks (CIE):**

| Attendance | Assignment/<br>Microproject | Internal<br>Examination-1<br>(Written) | Internal<br>Examination- 2<br>(Written ) | Total |
|------------|-----------------------------|--|--|-------|

**End Semester Examination Marks (ESE)**

*In Part A, all questions need to be answered and in Part B, each student can choose any one full question out of two questions*

| Part A  | Part B   | Total     |
|---|--|-----------|
| <ul style="list-style-type: none"> <li>● 2 Questions from each module.</li> <li>● Total of 8 Questions, each carrying 3 marks</li> </ul> <p style="text-align: center;"><b>(8x3 =24marks)</b></p> | <ul style="list-style-type: none"> <li>● Each question carries 9 marks.</li> <li>● Two questions will be given from each module, out of which 1 question should be answered.</li> <li>● Each question can have a maximum of 3 sub divisions.</li> </ul> <p style="text-align: center;"><b>(4x9 = 36 marks)</b></p> | <b>60</b> |

## Course Outcomes (COs)

At the end of the course students should be able to:

| Course Outcome |  | Bloom's Knowledge Level (KL) |
|----------------|--|------------------------------|
| <b>CO1</b>     | Formulate an optimization problem to optimize an engineering application using the principles of basic calculus. | <b>K2</b>                    |
| <b>CO2</b>     | Apply the Simplex method to solve a linear programming problem   | <b>K3</b>                    |
| <b>CO3</b>     | Solve the unconstrained optimization problems using gradient based method.                                       | <b>K3</b>                    |
| <b>CO4</b>     | Apply the various optimization techniques to solve a constrained optimization problem                            | <b>K3</b>                    |
| <b>CO5</b>     | Use metaheuristic algorithms to solve constrained and unconstrained optimization problems                        | <b>K3</b>                    |

Note: K1- Remember, K2- Understand, K3- Apply, K4- Analyse, K5- Evaluate, K6- Create

## SEMESTER S6

### IMAGE PROCESSING APPLICATIONS

|  |                                       |                    |               |
|--|---------------------------------------|--------------------|---------------|
| <b>Course Code</b>                         | <b>PEECT 635</b>                      | <b>CIE Marks</b>   | 40            |
| <b>Teaching Hours/Week<br/>(L: T:P: R)</b> | 3:0:0:0                               | <b>ESE Marks</b>   | 60            |
| <b>Credits</b>                             | 5/3                                   | <b>Exam Hours</b>  | 2Hrs. 30 Min. |
| <b>Prerequisites (if any)</b>              | PBECT504 Digital<br>Signal Processing | <b>Course Type</b> | Theory        |

#### Course Objectives:

1. To introduce the fundamental concepts of Digital Image Processing and study the various transforms required for image processing.
2. To study spatial and frequency domain image enhancement and image restoration methods.
3. To understand image compression and segmentation techniques.
4. To apply the principles of image processing techniques in real life images.

#### SYLLABUS

| <b>Module No.</b> | <b>Syllabus Description</b>   | <b>Contact Hours</b> |
|-------------------|---|----------------------|
| <b>1</b>          | Digital Image Fundamentals: Image representation, Types of images, Elements of DIP system, Basic relationship between pixels, Distance Measures, Simple image formation model. Brightness, contrast, hue, saturation, Mach band effect. Colour image fundamentals-RGB, CMY, HIS models, 2D sampling and quantization. | <b>9</b>             |
| <b>2</b>          | 2D Image transforms: DFT, Properties, Walsh transform, Hadamard transform, Haar transform, DCT, KL transform and Singular Value Decomposition.<br><br>Image Compression: Image compression model, Lossy, lossless compression, Concept of transform coding, JPEG Image compression standard.                          | <b>9</b>             |

|          |  |          |
|----------|--|----------|
| <b>3</b> | <p>Image Enhancement: Spatial domain methods: Basic Gray Level Transformations, Histogram Processing, Enhancement Using Arithmetic/Logic Operations, Basics of Spatial Filtering, Smoothing spatial Filters, Sharpening spatial Filters.</p> <p>Frequency domain methods: low pass filtering, high pass filtering, homomorphic filtering.</p>                            | <b>9</b> |
| <b>4</b> | <p>Image Restoration: Degradation model, Inverse filtering- removal of blur caused by uniform linear motion, Minimum Mean Square Error (Wiener) Filtering. Constrained Least square filtering, geometric mean filtering.</p> <p>Image segmentation: Region based approach, clustering, Segmentation based on thresholding, edge based segmentation, Hough Transform.</p> | <b>9</b> |

**Course Assessment Method**  
(CIE: 40 marks, ESE: 60 marks)

**Continuous Internal Evaluation Marks (CIE):**

| <b>Attendance</b> | <b>Internal Ex</b> | <b>Evaluate</b> | <b>Analyse</b> | <b>Total</b> |
|-------------------|--------------------|-----------------|----------------|--------------|
| <b>5</b>          | <b>15</b>          | <b>10</b>       | <b>10</b>      | <b>40</b>    |

**Criteria for Evaluation (Evaluate and Analyse): 20 marks**

Students should analyze real world image processing problems and implement using Matlab or any other programming language.

**Evaluation Methods:**

1. Experiments using software tools: (10 marks)
2. Course Project applying the principles of image processing techniques:(10 marks)

Project phases: Proposal, Implementation, Testing, Final Report, Presentations and Viva Voce:

**The following topics may be identified for project.**

1. Illustration of different colour image models and its application.
2. Implementation of image transforms and compression algorithms
3. Examine different spatial and frequency domain filtering techniques on real world example images.
4. Implement image restoration techniques, adjust parameters, and evaluate results qualitatively and quantitatively

**End Semester Examination Marks (ESE):**

*In Part A, all questions need to be answered and in Part B, each student can choose any one full question out of two questions*

| <b>Part A</b>  | <b>Part B</b>   | <b>Total</b> |
|--|---|--------------|
| <ul style="list-style-type: none"> <li>• 2 Questions from each module.</li> <li>• Total of 8 Questions, each carrying 3 marks<br/><b>(8x3 =24marks)</b></li> </ul> | 2 questions will be given from each module, out of which 1 question should be answered. Each question can have a maximum of 3 sub divisions.<br>Each question carries 9 marks.<br><b>(4x9 = 36 marks)</b> | <b>60</b>    |

**Course Outcomes (COs)**

At the end of the course students should be able to:

| <b>Course Outcome</b> |   | <b>Bloom's Knowledge Level (KL)</b> |
|-----------------------|---|-------------------------------------|
| <b>CO1</b>            | Compare different colour model representations of image processing system                                       | <b>K4</b>                           |
| <b>CO2</b>            | Analyse the various concepts and mathematical transforms and compression schemes necessary for image processing | <b>K4</b>                           |
| <b>CO3</b>            | Illustrate the various schemes of image filtering   | <b>K5</b>                           |
| <b>CO4</b>            | Determine the techniques for restoration of images  | <b>K5</b>                           |

Note: K1- Remember, K2- Understand, K3- Apply, K4- Analyse, K5- Evaluate, K6- Create

### CO-PO Mapping Table (Mapping of Course Outcomes to Program Outcomes)

**SEMESTER S6**  
**VLSI CIRCUIT DESIGN**

|  |   |                    |                |
|--|---|--------------------|----------------|
| <b>Course Code</b>                         | <b>PBECT604</b>   | <b>CIE Marks</b>   | 60             |
| <b>Teaching Hours/Week<br/>(L: T:P: R)</b> | 3:0:0:1   | <b>ESE Marks</b>   | 40             |
| <b>Credits</b>                             | 4   | <b>Exam Hours</b>  | 2 Hrs. 30 Min. |
| <b>Prerequisites (if any)</b>              | PCECT302 Solid State Devices,<br>PCECT303 Analog Circuits,<br>PBECT304 Logic Circuit Design | <b>Course Type</b> | Theory         |

**Course Objectives:**

1. To provide a comprehensive understanding of VLSI design methodologies, including ASIC types, SoCs and FPGA devices, design flows, methodologies.
2. To provide a comprehensive understanding of VLSI fabrication techniques.
3. To provide a solid foundation in static CMOS logic design and analysis, layout design and the application of design rules in layout design.
4. To cover dynamic logic design principles and the design and operation of storage cells.

**SYLLABUS**

| <b>Module No.</b> | <b>Syllabus Description</b>  | <b>Contact Hours</b> |
|-------------------|--|----------------------|
| <b>1</b>          | <b>VLSI Design Methodologies:</b> Introduction, Moore's law, ASIC design, Full custom ASICs, Standard cell based ASICs, Gate array based ASICs, SoCs, FPGA devices, ASIC and FPGA Design flows, Top-Down and Bottom-Up design methodologies, Logical and Physical design.  | <b>6</b>             |
| <b>2</b>          | <b>Fabrication techniques:</b> Material Preparation Purification and Crystal growth (CZ process), Wafer preparation, Epitaxy - molecular beam epitaxy, Thermal Oxidation- Dry and Wet oxidation, Diffusion and ion implantation techniques, Lithography- Photo lithographic sequence, Electron Beam Lithography, Etching, Chemical Vapor Deposition and Physical Vapor Deposition.<br><b>MOSFET Fabrication techniques:</b> Twin-Tub fabrication sequence, Fabrication process flow. | <b>8</b>             |

|          |   |           |
|----------|---|-----------|
| <b>3</b> | <p><b>Static CMOS Logic Design:</b> MOSFET Logic Design - NMOS Inverter (Static analysis only), basic logic gates, CMOS logic, Static and transient analysis of CMOS inverter, Static and dynamic power dissipation (detailed analysis not required), Propagation delays. Realization of logic functions with static CMOS logic.</p> <p><b>Layout Design and Design rules:</b> Stick Diagram and Design rules-micron rules and Lambda rules. (definitions only). Layout of CMOS Inverter, two input NAND and NOR gates.</p>   | <b>11</b> |
| <b>4</b> | <p><b>Pass transistors and Transmission gate logic:</b> Basic concepts, Realisation of logic gates using pass transistors and complementary pass transistors.</p> <p><b>Dynamic logic Design:</b> Pre charge, Logic evaluation, Issues in dynamic logic, Domino Logic, NP domino logic, Realisation of logic gates circuits using dynamic logic (NAND and NOR).</p> <p><b>Sequential Logic and Memory design:</b> Behaviour of bistable elements, CMOS D latch and edge triggered flip flop, Read Only Memory- 4x4 MOS ROM Cell Arrays (NOR, NAND), Random Access Memory- SRAM-Six transistor CMOS SRAM cell, DRAM-Three transistor and One transistor Dynamic Memory Cell.</p> | <b>11</b> |

### Suggestion on Project Topics

#### Sample Projects:

1. Create a standard cell library including basic logic gates, flip-flops, and multiplexers.

Tasks:

- Design cells using schematic capture.
- Perform logic synthesis to verify functionality.
- Simulate the cells using Verilog testbenches.

2. Design and implement a simple RISC processor on an FPGA.

Tasks:

- Design the processor architecture using Verilog.
- Implement and synthesize the design using FPGA tools (e.g., Xilinx Vivado).
- Verify functionality through simulation and hardware testing.

3. Simulate the fabrication process of a MOSFET using TCAD tools.

Tasks:

- Model the different stages of MOSFET fabrication (e.g., oxidation, lithography, doping).
- Analyze the effects of various parameters on device characteristics.

4. Create the layout of CMOS logic gates and perform design rule checking.

Tasks:

- Draw the stick diagrams for a CMOS inverter and two-input NAND/NOR gates.
- Create the corresponding layout using layout tools.
- Verify the layout against micron and lambda design rules.

5. Design and simulate basic memory cells including SRAM and DRAM.

Tasks:

- Design a 4x4 MOS ROM cell array and SRAM/DRAM cells using Verilog.
- Simulate the memory cells to verify their read and write operations.
- Analyze the performance and area of different memory cell designs.

**Course Assessment Method**  
(CIE: 60 marks, ESE: 40 marks)

**Continuous Internal Evaluation Marks (CIE):**

| Attendance | Project | Internal Ex-1 | Internal Ex-2 | Total |
|------------|---------|---------------|---------------|-------|
| 5          | 30      | 12.5          | 12.5          | 60    |

**End Semester Examination Marks (ESE)**

*In Part A, all questions need to be answered and in Part B, each student can choose any one full question out of two questions*

| Part A  | Part B  | Total |
|---|---|-------|
| <ul style="list-style-type: none"><li>• 2 Questions from each module.</li><li>• Total of 8 Questions, each carrying 2 marks<br/>(8x2 =16 marks)</li></ul> | 2 questions will be given from each module, out of which 1 question should be answered. Each question can have a maximum of 2 sub divisions. Each question carries 6 marks.<br><br>(4x6 = 24 marks) | 40    |

## Course Outcomes (COs)

At the end of the course students should be able to:

| Course Outcome |  | Bloom's Knowledge Level (KL) |
|----------------|--|------------------------------|
| <b>CO1</b>     | Explain VLSI design methodologies including ASIC types, SoC and FPGA devices, design flows, methodologies.       | <b>K2</b>                    |
| <b>CO2</b>     | Describe VLSI fabrication techniques.  | <b>K2</b>                    |
| <b>CO3</b>     | Design, analyse and create the layout of static CMOS logic circuits adhering to design rules and specifications. | <b>K3</b>                    |
| <b>CO4</b>     | Design and analysis of dynamic logic circuits and the implementation of basic storage cells.                     | <b>K3</b>                    |

Note: K1- Remember, K2- Understand, K3- Apply, K4- Analyse, K5- Evaluate, K6- Create

| 4            | Execution and Implementation  | 10             |
| 5            | Final Presentations   | 5              |
| 6            | Project Quality, Innovation and Creativity                          | 3              |
| <b>Total</b> |   | <b>30</b>      |

**1. Project Planning and Proposal (5 Marks)**

- Clarity and feasibility of the project plan
- Research and background understanding
- Defined objectives and methodology

**2. Contribution in Progress Presentation and Question Answer Sessions (4 Marks)**

- Individual contribution to the presentation
- Effectiveness in answering questions and handling feedback

**3. Involvement in the Project Work and Team Work (3 Marks)**

- Active participation and individual contribution
- Teamwork and collaboration

**4. Execution and Implementation (10 Marks)**

- Adherence to the project timeline and milestones
- Application of theoretical knowledge and problem-solving
- Final Result

**5. Final Presentation (5 Marks)**

- Quality and clarity of the overall presentation
- Individual contribution to the presentation
- Effectiveness in answering questions

**6. Project Quality, Innovation, and Creativity (3 Marks)**

- Overall quality and technical excellence of the project
- Innovation and originality in the project

Creativity in solutions and approaches

## SEMESTER S6

### DESIGN THINKING AND PRODUCT DEVELOPMENT

(Common to Group A & Group B)

|  |                 |                    |                |
|--|-----------------|--------------------|----------------|
| <b>Course Code</b>                     | <b>GXEST605</b> | <b>CIE Marks</b>   | 40             |
| <b>Teaching Hours/Week (L: T:P: R)</b> | 2:0:0:0         | <b>ESE Marks</b>   | 60             |
| <b>Credits</b>                         | 2               | <b>Exam Hours</b>  | 2 Hrs. 30 Min. |
| <b>Prerequisites (if any)</b>          | None            | <b>Course Type</b> | Theory         |

#### Course Objectives:

1. To guide students through the iterative stages of design thinking, including empathizing with users, defining problems, ideating solutions and developing Proof of Concepts (PoC) and technical feasibility studies.
2. To promote the development of critical thinking skills by engaging students in integrative inquiry, where they ask meaningful questions that connect classroom knowledge with real-world applications.
3. To equip students with the ability to involve in product design considering the sustainability, inclusivity, diversity and equity aspects.

### SYLLABUS

| <b>Module No.</b> | <b>Syllabus Description</b>   | <b>Contact Hours</b> |
|-------------------|---|----------------------|
| 1                 | <b>Fundamentals of design thinking and product development:</b> Overview of stages of product development lifecycle; Design thinking -Definition-Design thinking for product innovation; Bringing social impact in ideation-Identifying societal needs-understanding multi-faceted issues-community engagement and empathetic design- technological innovation meeting societal needs; Understanding and Bridging the divide using Human Centered Design (HCD); Designing for inclusivity in product development-embracing user diversity - Long term impact - sustainability encompassing environmental,economic and social dimensions; Technology Readiness Level in the Innovation Life-cycle; Performing a self-check on innovative | 6                    |

|   |  |   |
|---|--|---|
|   | ideas - Originality of idea- understanding innovation landscape - patentability - understanding the economic landscape - Unique Selling Proposition (USP) - Repeatability and Manufacturability - Sustainability - Leveraging business models for comprehensive analysis   |   |
| 2 | <p><b>Empathize:</b> Design thinking phases; Role of empathy in design thinking; Methods of empathize phase - Ask 5 Why/ 5 W+H questions; Empathy maps - Things to be done prior to empathy mapping - Activities during and after the session; Understanding empathy tools - Customer Journey Map - Personas.</p> <p><b>Define:</b> Methods of Define Phase: Storytelling, Critical items diagrams, Define success.</p>  | 6 |
| 3 | <p><b>Ideation :</b> Stages of ideation; Techniques and tools - Divergent thinking tools - Convergent thinking tools - Idea capturing tools; Cross-industry inspiration; Role of research in ideation - Market research - consumer research - leveraging research for informed ideation; Technological trends - navigating the technological landscape - Integrating emerging technologies; Feasibility studies - technical, economic, market, operational, legal, and ethical feasibility; Ideation session- techniques and tips.</p> <p><b>Proof of Concept (PoC) :</b> Setting objectives; Risk assessment; Technology scouting; Document and process management; Change management; Knowledge Capture; Validating PoC; Story telling in PoC presentation</p>   | 6 |
| 4 | <p><b>Design:</b> Navigating from PoC to detailed design; Developing Specification Requirement Document (SRD)/Software Requirement Specification (SRS); Design for manufacturability; Industrial standards and readability of code; Design to cost; Pre-compliance; Optimized code; Design Failure Mode and Effects Analysis (DFMEA); Forecasting future design changes.</p> <p><b>Prototyping:</b> Alpha prototypes; Beta prototypes; Transition from design to prototype; Goals and expectations for Alpha and Beta prototypes; Effective strategies for maintaining timeline in prototyping; Testing and refining Alpha prototypes; Transitioning to Beta prototypes.</p> <p><b>Pilot build:</b> Definition and purpose of a pilot build; setting objectives; Identification and selection of manufacturing partner for pilot build; Testing procedures in pilot build; Scaling from pilot build to full-scale production / implementation.</p> | 6 |

**Course Assessment Method**  
(CIE: 40 marks, ESE: 60 marks)

**Continuous Internal Evaluation Marks (CIE):**

| Attendance | Assignments | Internal Examination | Reflective Journal and Portfolio | Total |
|------------|-------------|----------------------|----------------------------------|-------|
| 5          | 20          | 10                   | 5                                | 40    |

**End Semester Examination Marks (ESE)**

*In Part A, all questions need to be answered and in Part B, each student can choose any one full question out of two questions*

| Part A  | Part B   | Total     |
|---|--|-----------|
| <ul style="list-style-type: none"> <li>• 2 Questions from each module.</li> <li>• Total of 8 Questions, each carrying 3 marks</li> </ul> <p style="text-align: center;"><b>(8x3 =24marks)</b></p> | <ul style="list-style-type: none"> <li>• Each question carries 9 marks.</li> <li>• Two questions will be given from each module, out of which 1 question should be answered.</li> <li>• Each question can have a maximum of 3 sub divisions.</li> </ul> <p style="text-align: center;"><b>(4x9 = 36 marks)</b></p> | <b>60</b> |

**Course Outcomes (COs)**

At the end of the course students should be able to:

| Course Outcome |   | Bloom's Knowledge Level (KL) |
|----------------|---|------------------------------|
| CO1            | Empathize to capture the user needs and define the objectives with due consideration of various aspects including inclusivity, diversity and equity         | <b>K5</b>                    |
| CO2            | Ideate using divergent and convergent thinking to arrive at innovative ideas keeping in mind the sustainability, inclusivity, diversity and equity aspects. | <b>K6</b>                    |
| CO3            | Engage in Human Centric Design of innovative products meeting the specifications  | <b>K5</b>                    |
| CO4            | Develop Proof of Concepts (PoC), prototypes & pilot build of products and test their performance with respect to the Specification Requirement Document.    | <b>K4</b>                    |
| CO5            | Reflect on professional and personal growth through the learnings in the course, identifying areas for further development                                  | <b>K4</b>                    |

Note: K1- Remember, K2- Understand, K3- Apply, K4- Analyse, K5- Evaluate, K6- Create

## CO-PO Mapping Table (Mapping of Course Outcomes to Program Outcomes)

|     | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 |
|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|

Note: 1: Slight (Low), 2: Moderate (Medium), 3: Substantial (High), -: No Correlation

| Text Books |  |                      |                               |                  |
|------------|--|----------------------|-------------------------------|------------------|
| Sl. No     | Title of the Book  | Name of the Author/s | Name of the Publisher         | Edition and Year |
| 1          | Product Sense: Engineering your ideas into reality                                     | Dr. K R Suresh Nair  | NotionPress.com               | 2024             |
| 2          | Change by Design: How Design Thinking Transforms Organizations and Inspires Innovation | Tim Brown            | HarperCollins Publishers Ltd. | 2009             |
| 3          | Design Thinking for Strategic Innovation   | Idris Mootee         | John Wiley & Sons Inc.        | 2013             |

### Sample Assignments:

1. Evaluate and prepare a report on how the aspects including inclusivity, diversity and equity are taken into consideration during the empathize and define phases of the Miniproject course.
2. Evaluate and prepare a report on how the aspects including sustainability, inclusivity, diversity and equity are taken into consideration during the ideate phase of the Miniproject course.
3. Evaluate and prepare a report on how User-Centric Design (UCD) is used in the design and development of PoC of the product being developed in the Miniproject course.
4. Prepare a plan for the prototype building of the product being developed in the Miniproject course.
5. Report on the activities during the empathize phase including the maps & other materials created during the sessions.
6. Report on the activities during the define phase including the maps & other materials created during the sessions.
7. Report of all the ideas created during the ideation phase of the Miniproject course through the tools including SCAMPER technique, SWOT analysis, Decision matrix analysis, six thinking hats exercise
8. Prepare a full scale production plan for the product being developed in the Miniproject course.
9. Create a Stanford Business Model Canvas related to the Miniproject.

An industrial visit of at least a day for experiential learning and submit a report on the learnings, for example industry standards and procedures.

## SEMESTER S6

### ENTERTAINMENT ELECTRONICS

|  |                 |                    |                |
|--|-----------------|--------------------|----------------|
| <b>Course Code</b>                         | <b>OEECT611</b> | <b>CIE Marks</b>   | 40             |
| <b>Teaching Hours/Week<br/>(L: T:P: R)</b> | 3:0:0:0         | <b>ESE Marks</b>   | 60             |
| <b>Credits</b>                             | 3               | <b>Exam Hours</b>  | 2 Hrs. 30 Min. |
| <b>Prerequisites (if any)</b>              | None            | <b>Course Type</b> | Theory         |

#### Course Objectives:

1. To provide broad knowledge on various industry standards, algorithms and technologies used to carry out digital audio and video broadcasting in infotainment industry.

#### SYLLABUS

| <b>Module No.</b> | <b>Syllabus Description</b>   | <b>Contact Hours</b> |
|-------------------|---|----------------------|
| <b>1</b>          | Review of Analog Television: Scanning, Horizontal and Vertical Synchronization, Color information, Transmission methods. NTSC and PAL standards. Digital media streaming: Packetized elementary stream of audio-video data, MPEG data stream, MPEG-2 transport stream packet, Accessing a program, scrambled programs, program synchronization. PSI, Additional (Network information and service description) information in data streams for set-top boxes.  | <b>9</b>             |
| <b>2</b>          | Digital Video Broadcasting (DVB): Satellite TV broadcasting – DVB-S Parameters, DVB-S Modulator, DVB-S set-top box, DVB-S2. Cable TV broadcasting – DVB-C Standard, DVB-C Modulator, DVB- C set-top box. Terrestrial TV broadcasting – DVB-T Standard, DVB-T Modulator, DVB-T Carriers and System Parameters, DVB-T receiver. Broadcasting for Handheld devices – DVB-H Standard DVB tele-text, DVB subtitling system. Digital Audio Broadcasting (DAB): Comparison of DAB with DVB. Physical layer of DAB. DAB Modulator, DAB Data Structure, DAB single frequency networks, Data broad casting using DAB. | <b>9</b>             |
| <b>3</b>          | High Definition Video and Audio: Pixel resolution, Comparison with Standard Definition TV, Review of Discrete Cosine Transforms (DCT),  | <b>9</b>             |

|          |   |          |
|----------|---|----------|
|          | Video Compression - Quantization levels, Horizontal/Vertical blanking interval, Vertical Color resolution, DPCM of moving pictures, DCT, Run-length coding. MPEG-4 Video coding.  |          |
| <b>4</b> | Display Technology: Block diagram of video reproduction system in a TV, Cathode Ray tubes, Basic principle of Plasma displays, LC displays, Light-emitting diode displays, Field emission displays, Organic light emitting device displays. Television of future: Holographic TV, Virtual Reality, Augmented Reality. | <b>9</b> |

**Course Assessment Method**  
(CIE: 40 marks, ESE: 60 marks)

**Continuous Internal Evaluation Marks (CIE):**

| <b>Attendance</b> | <b>Assignment/<br/>Microproject</b> | <b>Internal<br/>Examination-1<br/>(Written)</b> | <b>Internal<br/>Examination- 2<br/>(Written )</b> | <b>Total</b> |
|-------------------|-------------------------------------|---|---|--------------|
| <b>5</b>          | <b>15</b>                           | <b>10</b>                                       | <b>10</b>   | <b>40</b>    |

**End Semester Examination Marks (ESE)**

*In Part A, all questions need to be answered and in Part B, each student can choose any one full question out of two questions*

| <b>Part A</b>   | <b>Part B</b>  | <b>Total</b> |
|---|--|--------------|
| <ul style="list-style-type: none"> <li>• 2 Questions from each module.</li> <li>• Total of 8 Questions, each carrying 3 marks</li> </ul> <p style="text-align: center;"><b>(8x3 =24marks)</b></p> | <ul style="list-style-type: none"> <li>• Each question carries 9 marks.</li> <li>• Two questions will be given from each module, out of which 1 question should be answered.</li> <li>• Each question can have a maximum of 3 sub divisions.</li> </ul> <p style="text-align: center;"><b>(4x9 = 36 marks)</b></p> | <b>60</b>    |

## Course Outcomes (COs)

At the end of the course students should be able to:

| Course Outcome |  | Bloom's Knowledge Level (KL) |
|----------------|--|------------------------------|
| <b>CO1</b>     | Explain packetized streaming of digital media happens in the field of infotainment industry.           | <b>K2</b>                    |
| <b>CO2</b>     | Realise the critical aspects of DVB and DAB standards used for media broadcasting                      | <b>K2</b>                    |
| <b>CO3</b>     | Apply video coding/compression algorithms are used to produce high-definition video in MPEG-4 standard | <b>K3</b>                    |
| <b>CO4</b>     | Describe modern display technologies for video reproduction  | <b>K2</b>                    |

Note: K1- Remember, K2- Understand, K3- Apply, K4- Analyse, K5- Evaluate, K6- Create

### CO-PO Mapping Table (Mapping of Course Outcomes to Program Outcomes)

## SEMESTER S6

### COMPUTER NETWORKS

|  |                  |                    |                |
|--|------------------|--------------------|----------------|
| <b>Course Code</b>                         | <b>OEECT 612</b> | <b>CIE Marks</b>   | 40             |
| <b>Teaching Hours/Week<br/>(L: T:P: R)</b> | 3:0:0:0          | <b>ESE Marks</b>   | 60             |
| <b>Credits</b>                             | 3                | <b>Exam Hours</b>  | 2 Hrs. 30 Min. |
| <b>Prerequisites (if any)</b>              | None             | <b>Course Type</b> | Theory         |

#### Course Objectives:

1. The course aims to expose students to computer networks taking a top-down approach of viewing from the layer of user applications and zooming into link layer protocols. The principles of various protocols used in every layer are studied in detail,

#### SYLLABUS

| <b>Module No.</b> | <b>Syllabus Description</b>   | <b>Contact Hours</b> |
|-------------------|---|----------------------|
| <b>1</b>          | <b>Introduction to Computer Networks</b> Components of computer networks.<br>Transmission modes - serial and parallel transmission, asynchronous, synchronous, simplex, half duplex, full duplex communication.<br>Switching: circuit switching and packet switching.<br>Networks: Network criteria, physical structures, network models, categories of networks, Interconnection of Networks.<br>Delay and loss in packet-switched networks, Types of delay, Packet loss.<br>Layered Architecture: OSI model | <b>9</b>             |
| <b>2</b>          | <b>TCP/IP protocol suite:</b> Introduction<br><b>Application Layer:</b> Communication between processes, Web application: HTTP, Message format, Email application: SMTP, Message format, MIME, POP3, Domain Name System (DNS).<br><b>Transport Layer</b> connectionless and connection-oriented protocols. UDP-Protocols for reliable data transfer: ARQ protocols, stop-and-wait protocol, alternating-bit protocol, Go-back- N, Selective Repeat. TCP Connection, segment structure, RTT estimate, Flow     | <b>9</b>             |

|          |   |           |
|----------|---|-----------|
|          | control.<br><b>Congestion Control</b> General approaches. TCP congestion control.   |           |
| <b>3</b> | <b>Network Layer:</b> Datagram versus virtual-circuit network service, Router architecture, Routing and Forwarding, Static routing and Dynamic routing. Address Resolution protocols (ARP, RARP)<br>Subnetting, Classless Routing(CIDR), ICMP.<br><b>IPv4:</b> Datagram format, Fragmentation and reassembly, addressing, address assignment – manual and DHCP. IPv6- Datagram format, Transitioning from IPv4 to IPv6, IP security.<br><b>Routing Algorithms</b> Link-State (Dijkstra’s) Algorithm, Distance vector algorithm. Routing in Internet – RIP, OSPF, BGP. | <b>10</b> |
| <b>4</b> | <b>Link Layer</b> Services of link layer, Error detection and correction – checksum, CRC.<br>Multiple access protocols – Channel partitioning, random access. ALOHA – pure and slotted, efficiency, CSMA, CSMA/CA, CSMA/CD. Link layer addressing: MAC address, Ethernet. Wireless Networks IEEE 802.11 wireless LAN.<br><b>Physical Layer:</b> Guided and unguided transmission media (Co-axial cable, UTP,STP, Fiber optic cable)   | <b>8</b>  |

**Course Assessment Method**  
**(CIE: 40 marks, ESE: 60 marks)**

**Continuous Internal Evaluation Marks (CIE):**

| <b>Attendance</b> | <b>Assignment/<br/>Microproject</b> | <b>Internal<br/>Examination-1<br/>(Written)</b> | <b>Internal Examination-<br/>2<br/>(Written )</b> | <b>Total</b> |
|-------------------|-------------------------------------|---|---|--------------|
| <b>5</b>          | <b>15</b>                           | <b>10</b>                                       | <b>10</b>   | <b>40</b>    |

## End Semester Examination Marks (ESE)

*In Part A, all questions need to be answered and in Part B, each student can choose any one full question out of two questions*

| Part A  | Part B   | Total     |
|---|--|-----------|
| <ul style="list-style-type: none"> <li>2 Questions from each module.</li> <li>Total of 8 Questions, each carrying 3 marks</li> </ul> <p><b>(8x3 =24marks)</b></p> | <ul style="list-style-type: none"> <li>Each question carries 9 marks.</li> <li>Two questions will be given from each module, out of which 1 question should be answered.</li> <li>Each question can have a maximum of 3 sub divisions.</li> </ul> <p><b>(4x9 = 36 marks)</b></p> | <b>60</b> |

## Course Outcomes (COs)

At the end of the course students should be able to:

| Course Outcome |   | Bloom's Knowledge Level (KL) |
|----------------|---|------------------------------|
| CO1            | Summarize the principles and components of computer networks, switching, basic concepts of delay analysis and the layered network architecture. | K2                           |
| CO2            | Demonstrate protocols and the functions of different layers.  | K2                           |
| CO3            | Analyse the concept of routing and addressing protocols in the context of computer networking.  | K3                           |
| CO4            | Make use of different physical communication standards in computer networks.  | K3                           |

Note: K1- Remember, K2- Understand, K3- Apply, K4- Analyse, K5- Evaluate, K6- Create

## CO-PO Mapping Table (Mapping of Course Outcomes to Program Outcomes)

|     | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 |
|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|
| CO1 | 3   |     |     |     |     | -   | -   | -   | -   | -    | -    | 2    |
| CO2 | 3   |     |     |     |     | -   | -   | -   | -   | -    | -    | 2    |

## SEMESTER S6

### BIOMEDICAL ENGINEERING

|  |                 |                    |                |
|--|-----------------|--------------------|----------------|
| <b>Course Code</b>                         | <b>OEECT613</b> | <b>CIE Marks</b>   | 40             |
| <b>Teaching Hours/Week<br/>(L: T:P: R)</b> | 3-0-0--0        | <b>ESE Marks</b>   | 60             |
| <b>Credits</b>                             | 3               | <b>Exam Hours</b>  | 2 Hrs. 30 min. |
| <b>Prerequisites (if any)</b>              | None            | <b>Course Type</b> | Theory         |

#### Course Objectives:

1. This course will introduce the various aspects of biomedical engineering and its applications escribed using engineering principles
2. The student will be able to understand the techniques and uses of modern diagnostic and therapeutic equipment.

### SYLLABUS

| <b>Module No.</b> | <b>Syllabus Description</b>  | <b>Contact Hours</b> |
|-------------------|--|----------------------|
| <b>1</b>          | Introduction to bio-medical engineering,<br><br>Sources of bio-electric potential: Resting and action potential, propagation of action potentials. Various bioelectric potentials (ECG, EEG, EMG, ERG, EOG, EGG concept only.)<br><br>Electrode theory: Nernst equation, Electrode skin interface<br><br>Bio-potential electrodes: Microelectrodes, skin surface electrodes, needle electrodes<br><br>Bio-potential amplifiers: instrumentation amplifiers, carrier amplifiers, isolation amplifiers, chopper amplifiers | <b>9</b>             |

|   |  |   |
|---|--|---|
| <p style="text-align: center;"><b>2</b></p> | <p>Heart and cardiovascular system: electro conduction system of the heart, ECG lead configurations, Einthoven triangle, Electrocardiography, ECG machine - block diagram, ECG recording system..</p> <p>The human nervous system: Neurons, action potential of brain, brain waves, placement of electrodes, EEG recording, evoked potential,</p> <p>Electrical activity of muscles: EMG signal acquisition and analysis. Myoelectric control system. Electrical stimulation of the muscle and nerve, Applications of EMG</p>  | <p style="text-align: center;"><b>9</b></p> |
| <p style="text-align: center;"><b>3</b></p> | <p>Instruments for clinical laboratory: Oxymeters, blood cell counter, flame photometer, Spectrophotometer</p> <p>Therapeutic Equipments: Principles, block schematic diagram, working and applications of pacemakers, cardiac defibrillators, heart–lung machine, dialyzers, surgical diathermy equipment, ventilators</p> <p>Biomedical Telemetry system: Components of biotelemetry system, application of telemetry in medicine, single channel telemetry system for ECG.</p>  | <p style="text-align: center;"><b>9</b></p> |
| <p style="text-align: center;"><b>4</b></p> | <p>Medical Imaging systems (Basic Principle only): X-ray imaging - X-ray machine, applications of X-rays in medicine.</p> <p>Computed Tomography: Principle, image reconstruction, scanning system and applications</p> <p>Ultrasonic imaging systems: Basic pulse echo system, Different types of Ultrasonics systems:, A-Scan, B-Scan, M-Scan, applications, real-time ultrasonic imaging systems and probes.</p> <p>Magnetic Resonance Imaging – Basic NMR components, Biological effects and advantages of NMR imaging</p> | <p style="text-align: center;"><b>9</b></p> |

**Course Assessment Method**  
**(CIE: 40 marks , ESE: 60 marks)**

**Continuous Internal Evaluation Marks (CIE):**

| <b>Attendance</b> | <b>Assignment/<br/>Microproject</b> | <b>Internal<br/>Examination-1<br/>(Written)</b> | <b>Internal<br/>Examination- 2<br/>(Written )</b> | <b>Total</b> |
|-------------------|-------------------------------------|---|---|--------------|
| <b>5</b>          | <b>15</b>                           | <b>10</b>                                       | <b>10</b>   | <b>40</b>    |

**End Semester Examination Marks (ESE)**

*In Part A, all questions need to be answered and in Part B, each student can choose any one full question out of two questions*

| <b>Part A</b>  | <b>Part B</b>  | <b>Total</b> |
|--|--|--------------|
| <ul style="list-style-type: none"><li>● 2 Questions from each module.</li><li>● Total of 8 Questions, each carrying 3 marks</li></ul> <p style="text-align: center;"><b>(8x3 =24marks)</b></p> | <ul style="list-style-type: none"><li>● Each question carries 9 marks.</li><li>● Two questions will be given from each module, out of which 1 question should be answered.</li><li>● Each question can have a maximum of 3 sub divisions.</li></ul> <p style="text-align: center;"><b>(4x9 = 36 marks)</b></p> | <b>60</b>    |

### Course Outcomes (COs)

At the end of the course students should be able to:

| Course Outcome |  | Bloom's Knowledge Level (KL) |
|----------------|--|------------------------------|
| <b>CO1</b>     | Outline the basic bioelectric potentials and their implications in diagnostics                       | <b>K2</b>                    |
| <b>CO2</b>     | Summarize the principles used for diagnosis of abnormalities in the cardiovascular system            | <b>K2</b>                    |
| <b>CO3</b>     | Identify the techniques used for diagnosis and therapy in the neuromuscular and myoelectric systems. | <b>K2</b>                    |
| <b>CO4</b>     | Illustrate the principle and working of different types of bio medical equipment/devices             | <b>K2</b>                    |
| <b>CO5</b>     | State various diagnostic medical imaging techniques.   | <b>K2</b>                    |

Note: K1- Remember, K2- Understand, K3- Apply, K4- Analyse, K5- Evaluate, K6- Create

### CO-PO Mapping Table:

|            | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 |
|------------|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|
| <b>CO1</b> | 3   |     |     |     |     | 2   |     |     |     |      |      | 2    |
| <b>CO2</b> | 3   |     |     |     |     | 2   |     |     |     |      |      | 2    |
| <b>CO3</b> | 3   |     |     |     |     | 2   | 2   |     |     |      |      | 2    |
| <b>CO4</b> | 3   |     |     |     |     | 2   | 2   |     |     |      |      | 2    |
| <b>CO5</b> | 3   |     |     |     |     | 2   | 2   |     |     |      |      | 2    |

| <b>Text Books</b> |  |  |                              |                         |

**SEMESTER S6**  
**COMMUNICATION LAB II**

|  |                 |                    |                |
|--|-----------------|--------------------|----------------|
| <b>Course Code</b>                         | <b>PCECL607</b> | <b>CIE Marks</b>   | 50             |
| <b>Teaching Hours/Week<br/>(L: T:P: R)</b> | 0-0-3-0         | <b>ESE Marks</b>   | 50             |
| <b>Credits</b>                             | 2               | <b>Exam Hours</b>  | 2 Hrs. 30 min. |
| <b>Prerequisites (if any)</b>              | None            | <b>Course Type</b> | Theory         |

**Course Objectives:**

1. Develop practical skills in microwave and optical communication systems through hands-on experiments involving microwave sources, fiber optics, and optoelectronic components.
2. Enhance understanding and application of antenna and waveguide theories by designing, simulating, and measuring various antenna types and waveguide characteristics.

**Details of Experiment**

| <b>Expt. No</b> | <b>Experiment</b>   |
|-----------------|---|
|                 | <b>MICROWAVE EXPERIMENTS (Minimum four experiments are mandatory)</b>   |
| <b>1</b>        | Reflex Klystron Mode Characteristics.   |
| <b>2</b>        | GUNN diode characteristics.   |
| <b>3</b>        | VSWR and Frequency measurement.   |
| <b>4</b>        | Verify the relation between Guide wave length, free space wave length and cut off wave length for rectangular wave guide. |
| <b>5</b>        | Unknown load impedance measurement using smith chart and verification using transmission line equation.                   |
| <b>6</b>        | Measurement of Magic Tee characteristics.   |
| <b>7</b>        | Directional Coupler Characteristics.  |
|                 | <b>OPTICAL EXPERIMENTS (Minimum three experiments are mandatory)</b>  |
| <b>1</b>        | Setting up of Fiber optic Digital link.   |
| <b>2</b>        | Measurement of Numerical Aperture of an Optical fiber   |

|  |   |
|--|---|
| 3  | Study of losses in Optical fiber                          |
| 4  | Voltage vs. Current (V-I) characteristics of Laser Diode. |
| 5  | Voltage vs. Current (V-I) characteristics of LED.         |
| 6  | Characteristics of Photodiode                             |
| <b>ANTENNA EXPERIMENTS (Minimum three experiments are mandatory)</b> |   |
| 1  | Familiarization of any antenna simulation software        |
| 2  | Simulation of Dipole Antenna                              |
| 3  | Simulation of Patch Antenna                               |
| 4  | Simulation of Antenna Array.                              |
| 5  | Study of Vector Network Analyzer.                         |
| 6  | Antenna Pattern Measurement                               |

### **Course Assessment Method (CIE: 50 Marks, ESE 50 Marks)**

#### **Continuous Internal Evaluation Marks (CIE):**

| <b>Attendance</b> | <b>Preparation/Pre-Lab Work, experiments, Viva and Timely completion of Lab Reports / Record. (Continuous Assessment)</b> | <b>Internal Exam</b> | <b>Total</b> |
|-------------------|---|----------------------|--------------|
| <b>5</b>          | <b>25</b>   | <b>20</b>            | <b>50</b>    |

#### **End Semester Examination Marks (ESE):**

| <b>Procedure/ Preparatory work/Design/ Algorithm</b> | <b>Conduct of experiment/ Execution of work/ troubleshooting/ Programming</b> | <b>Result with valid inference/ Quality of Output</b> | <b>Viva voce</b> | <b>Record</b> | <b>Total</b> |
|--|---|---|------------------|---------------|--------------|
| <b>10</b>  | <b>15</b>   | <b>10</b>   | <b>10</b>        | <b>5</b>      | <b>50</b>    |

### Mandatory requirements for ESE:

- Submission of Record: Students shall be allowed for the end semester examination only upon submitting the duly certified record.
- Endorsement by External Examiner: The external examiner shall endorse the record.

### Course Outcomes (COs)

At the end of the course the student will be able to:

| Course Outcome |  | Bloom's Knowledge Level (KL) |
|----------------|--|------------------------------|
| CO1            | Familiarize the basic Microwave components and to analyse a few microwave measurements and its parameters.                                       | K4                           |
| CO2            | Describe the principles of fiber-optic communications and the different kinds of losses, signal distortion and other signal degradation factors. | K2                           |
| CO3            | Design and simulate basic antenna experiments with simulation tools.   | K6                           |

*K1- Remember, K2- Understand, K3- Apply, K4- Analyse, K5- Evaluate, K6- Create*

### CO-PO Mapping Table

|     | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 |
|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|

## Continuous Assessment (25 Marks)

### **1. Preparation and Pre-Lab Work (7 Marks)**

- Pre-Lab Assignments: Assessment of pre-lab assignments or quizzes that test understanding of the upcoming experiment.
- Understanding of Theory: Evaluation based on students' preparation and understanding of the theoretical background related to the experiments.

### **2. Conduct of Experiments (7 Marks)**

- Procedure and Execution: Adherence to correct procedures, accurate execution of experiments, and following safety protocols.
- Skill Proficiency: Proficiency in handling equipment, accuracy in observations, and troubleshooting skills during the experiments.
- Teamwork: Collaboration and participation in group experiments.

### **3. Lab Reports and Record Keeping (6 Marks)**

- Quality of Reports: Clarity, completeness and accuracy of lab reports. Proper documentation of experiments, data analysis and conclusions.
- Timely Submission: Adhering to deadlines for submitting lab reports/rough record and maintaining a well-organized fair record.

### **4. Viva Voce (5 Marks)**

- Oral Examination: Ability to explain the experiment, results and underlying principles during a viva voce session.

*Final Marks Averaging: The final marks for preparation, conduct of experiments, viva, and record are the average of all the specified experiments in the syllabus.*

## **Evaluation Pattern for End Semester Examination (50 Marks)**

### **1. Procedure/Preliminary Work/Design/Algorithm (10 Marks)**

- Procedure Understanding and Description: Clarity in explaining the procedure and understanding each step involved.
- Preliminary Work and Planning: Thoroughness in planning and organizing materials/equipment.
- Algorithm Development: Correctness and efficiency of the algorithm related to the experiment.
- Creativity and logic in algorithm or experimental design.

### **2. Conduct of Experiment/Execution of Work/Programming (15 Marks)**

- Setup and Execution: Proper setup and accurate execution of the experiment or programming task.

### **3. Result with Valid Inference/Quality of Output (10 Marks)**

- Accuracy of Results: Precision and correctness of the obtained results.
- Analysis and Interpretation: Validity of inferences drawn from the experiment or quality of program output.

### **4. Viva Voce (10 Marks)**

- Ability to explain the experiment, procedure results and answer related questions
- Proficiency in answering questions related to theoretical and practical aspects of the subject.

### **5. Record (5 Marks)**

- Completeness, clarity, and accuracy of the lab record submitted
